SUMMARY OF GRSC/GTSC HOD ACTIONS

Agreed Action	Responsibility
Form group to propose actions for encouraging industry to return to standards work	***Karl-Heinz Rosenbrock***
Form a discussion group around the area of redefining process • internal (GTSC and GRSC work); and • external (working with other organizations)	***Dan Bart***
Form a group to look at more effective working methods for PSOs	***Electronic Working Group***
Examine the implications of hosting a GSC meeting (GRSC and GTSC meeting together)	***TSACC and ACIF jointly***
Inter-session HoD telephone meeting at 1200 UCT on Tuesday 18 June, 2002	***ACIF /TSACC***
Joint HoD telephone meeting six weeks before GTSC1/GRSC1	***TSACC***

DETAILS OF HOD STRATEGIC ACTIONS

1 DECISION/ACTION REQUESTED

Consideration for action on the following issues:

a. as experts in telecommunications standards process, GSC and RAST should exchange more on issues of process
b. develop activities to enhance the value of the GSC and RAST experience
c. provide guidance on ways to encourage resources to return to standardization work under the PSOs
d. provide leadership in how to provide cost- and resource-effective hosting arrangements

2 REFERENCES

Special discussion group on Strategic Issues – 7 November 2001

3 RATIONALE

Based on discussions at the initial Heads of Delegation meeting on 4 November 2001, a meeting was held of representatives from the GSC and RAST member organizations to discuss strategies and issues to improve and refocus the work of the GSC and RAST. The HoD meeting produced several issues and ideas to help launch the discussions. These points are attached as Appendix A.

The discussion group met 7 November 2001 and identified over 25 issues and ideas. These ideas form the basis for the recommendations outlined below. Many of the suggestions and issues focused on two main themes; the re-positioning of GSC and RAST towards a more process-focused and strategic focus, and the identification of more efficient and effective means of conducting our work.

From the many issues and ideas that were identified by the group, there evolved four major themes of action. They are

a. to establish exchanges between and among ourselves on creating more effective processes for telecommunications standards development. This could involve sharing experiences in streamlining our processes.
b. to focus on bringing added value to subsequent GSC and RAST meetings through more effective ways of soliciting expert analysis on papers generated by member organizations to establish subsequent dialog and networking opportunities, by focusing on problem oriented working techniques, and more effective information sharing techniques
c. to focus on encouraging those who have moved away from standardization work in the PSOs through promotion of the benefits of working through the PSOs. This will need further study to flesh out an action in this area.
d. to provide guidance in the hosting of future GSC and RAST events to maximize the resourcing and reduce the overhead on delivering successful events.

4 CONSEQUENCES AND IMPLICATIONS

Follow through on the suggestions provided by this study group will go a long way to improving and refocusing the direction of GSC and RAST. It will encourage the promotion of working and interworking, enhance networking and provide more efficient and effective work activities.

However, the implications of inaction may be important. Individual delegates pointed it out after the session that GSC and RAST have looked at better working arrangements and refocusing exercises before, especially at Sapporo Japan. Resolution 6/6 was supposed to address the issue of more effective working methods. However, there was no follow through.

5 ISSUES FOR DISCUSSION

It is proposed that the following actions be taken:

form a group to propose actions for encouraging industry to return to standards work under the PSOs. There were several suggestions presented that need to be further discussed and expanded. ***Mr. Karl-Heinz Rosenbrock***

a. form a discussion group around the area of redefining process, in particular, two focuses
    a. internal, that is, to the way GSC and RAST carries on its work (e.g., through the creation of intersession meetings or teleconferences on key issues, periodic reminders of actions, electronic working methods, etc.) and
    b. external, that is how we as PSOs and members promote the value of working with other forums ***Mr. Dan Bart***

b. form a group to look at more effective working methods for PSOs. One of the hallmarks of GSC and RAST has been the exchange of information and methods between and among its members. It may be that the EWG may be the focus for this work. ***Electronic Working Group***

c. form an activity to examine the implications of hosting a GSC and RAST meeting. Although this was not completely discussed at the special session, it was a point of discussion afterward between TSACC and ACIF representatives. It was proposed that TSACC and ACIF jointly draft proposed suggestions on hosting a GSC and RAST event. These suggestions would form a guidance document for future hosts and would include timetables, electronic meeting tools, intersession meetings, etc. ***Jointly TSACC and ACIF***

PREVIOUS GSC & RAST SUBJECTS

Previous GSC High Interest Subjects

Intelligent Network (IN)/Wireless IN (WIN)/Virtual Home Environment (VHE)/Open Services Architecture (OSA)	Discontinued – aspects picked up in new HIS
Telecommunication Management Network (TMN)	Discontinued – aspects picked up in new HIS
Networks using IP (Internet Protocol)	Discontinued – aspects picked up in new HIS
Bearer Independent Call Control (BICC)	Discontinued – aspects picked up in new HIS

Previous GSC Information Sharing Subjects

Optical Transmission Networks	Continuing
xDSL	Expanded to include all broadband access

Previous RAST High Interest Subjects

ElectroMagnetic Compatibility(EMC)	Discontinued
Human Health Effects by RF exposure	Continuing (Res RAST10/2)
Fixed Wireless Access(FWA) and Radio Local Area Networks (LANS)	Incorporated in Res RAST 10/5
Satellite Services	Discontinued
Internet Protocol over wireless media (including satellite)	Discontinued, covered in Res GSC7/1 on NGN
Digital Broadcasting	Discontinued
Intelligent Transportation System (ITS)	Continuing (Res RAST 10/7)

Previous Joint RAST/GSC High Interest Subject

IMT-2000	Continuing

Previous Joint GSC/RAST Information Sharing Subject

Identification and Location Services	Continuing
