

## Bronze Service Provider Package

**Special offer as a part of the ITU-WISeKey agreement**  
**Free of charge pre-configured and tested**  
**Registration Authority System**

The Bronze Service Provider annual subscription fee is **\$7'500**. This annual fee includes the number of those certificates corresponding to this value (e.g. 300 x first year subscription fees or 170 full three year subscription for High Trust Standard Certificate or any combination thereof).

High Trust Standard Certificates	First year subscription fee per certificate [USD]	Subsequent year annual subscription fee per certificate [USD]	Full three year subscription per certificate (save 20%) [USD]
1-499	25.-	15,-	44.-
500-999	20.-	15,-	40.-
1000-1999	18.-	15,-	38,40
+ 2000	15.-	15,-	36.-

All prices are net and do not include VAT

The WISeKey High Trust Standard Certificate has a validity period of 3 years. There are two subscription models available where either the certificate can be paid for on an annual basis or alternatively the 3 years period can be paid in full at a reduced price.

Amount of Units	USB Token 8K	Smart Card + Serial Reader	Smart Card + USB Reader	Smart Card + PCMCIA Reader
1-499	32,-	36,-	43,-	70,-
500-999	30,-	34,-	40,-	65,-
1000 - 1999	28,-	32,-	37,-	59,-
+ 2000	26,-	30,-	34,-	56,-

All prices are net and do not include VAT, any import/export duties, any costs for shipment or transportation. These items will be charged separately. Installation and integration of these items is also not included.

Security Key**

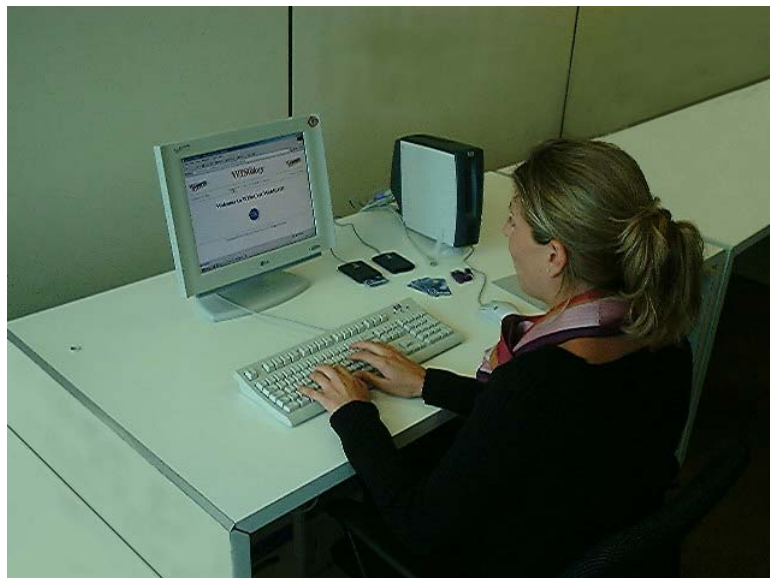

**WIS@key**

## **The Bronze Service Provider – a common ITU-WISeKey Solution**

One of the challenges facing organisations desiring to deploy a PKI infrastructure is the creation and management of digital certificates. Even large entities with numerous users can neither justify the costly investment required for an in-house CA nor is this practical from a security standpoint.

Within the framework of the ITU-WISeKey-WTC Geneva Partnership Agreement, WISeKey is assisting the ITU in expanding the Electronic Commerce for Developing Countries (EC-DC) project in more than 100 developing countries. This framework enables developing and least developed countries to acquire and use secure e-services solutions through non-exclusive partnerships with the industry. Under this cooperation, participating entities benefit from first-class security and trust services for e-transactions under affordable conditions by pooling and sharing available resources.

The WISeKey Bronze Service Provider (*BSP*) is a low cost solution that fulfils all requirements for locally generating, issuing and managing certificates through WISeKey's secure public key infrastructure. The *BSP* is a fully pre-configured workstation for an Affiliate Registration Organisation. It is securely linked to the Ecommerce PKI CA via the Internet acting as a satellite to the global WISeKey Public Key Infrastructure. The *BSP* provides the Registration Authority with all necessary functionality including secure cryptographic key generation and services to request the issuance, renewal, suspension and revocation of certificates. Besides complete hardware and software the *BSP* includes all the necessary legal, operational and technical documentation, an independent audit, training of Registration Officers, maintenance and support.

**Registration Officer using the Bronze Service Provider**

The WISeKey *BSP* will enable the subscriber to act as a fully authorised Registration Authority according to the legal and technical framework defined by WISeKey. It facilitates deployment and administration of smart card or token-based digital certificates based on face-to-face registration from any place in the world. This will allow customers to apply control on the issuance of certificates at a corporate level.

This turn-key ready solution using “Best-of breed” technology was designed to provide the most cost effective way to perform high level identification and registration and enables real non-repudiation necessary for digital signatures and high value transactions.

## **Bronze Service Provider Package Description**
