

**Mark Scanlan** is an independent consultant economist and Senior Associate and Project Manager at WIK. He has been a leading figure in the liberalisation of telecommunications in Europe, and has advised widely on liberalisation, privatisation, and regulatory policy design and practice. He has advised the European Commission and regulatory authorities in emerging economies such as Bahrain, Cyprus, Malaysia, Mauritius, Nigeria, Romania, Russia and Turkey as well as in other countries such as Ireland, Italy and the United Kingdom. He has also been retained by the ITU to consult on tariff reform, interconnection, and overall regulatory policies.

Between 1995 and 1998 he was full time Consultant to DG XIII (now Information Society) of the European Commission, where he advised on all aspects of telecommunication regulation and competition policy. Prior to his work at the Commission he was Visiting Research Fellow at the BTCE (Bureau of Transport and Communications Economics) in Australia, Research Economist at Brunel University, UK, and in the early 1990s was Economic Adviser at OFTEL (the UK telecommunications regulatory authority). He also worked for 3 years as an Economist with the New Zealand competition law authorities. Mark Scanlan has a Masters degree in Economics, and has 15 years experience advising on regulation and competition issues concerning
