

Executive Summary

The subject of this presentation is: “Liberalisation of ICT Market in Bosnia and Herzegovina”. After the short description of planned dynamics of telecom sector liberalisation in the field of ICT / telecommunication on the base of Telecom Policy we will present the current situation of the sector liberalisation and privatisation. The regulatory framework in telecommunication will be presented from aspect and role of Communication Regulatory Agency of Bosnia and Herzegovina.

We will make a short view on interconnection regime in the market of Bosnia and Herzegovina. We know that effective interconnection arrangements are essential for efficiency and development of today’s integrated global telecommunication networks. Interconnection is one of the foundations of viable competition, which in turn is the main driver of growth and innovation in telecommunication markets.

At the end we will speak about future regulation for ICT development on the “emerging market” such as the ICT market in B&H.
