Dublin, Ireland
12 March 2009*

International ICT data collection, dissemination and challenges

Esperanza Magpantay
Statistician

**Market Information and Statistics Division (STAT)
Telecommunication Development Bureau
International Telecommunication Union**

Committed to connecting the world

Topics

- Background
- ITU Data collection
- Challenges of ICT data collection
- WTI meeting recommendations
- ICT Development Index (IDI)
- Dissemination

ITU Statistical work

- ITU as UN specialized agency, produces and disseminates statistics covering its sector
 - ----> global statistical system of the UN
- **PP06 (Antalya): Resolution 131**
"instructs the Director of BDT
 - *to promote the adoption and regular reporting to ITU of community connectivity indicators...*
 - *to promote an index...*
 - *to cooperate with international bodies particularly the Partnership on Measuring ICT for Development..."*
- **WTDC06 (Rev.Doha): Resolution 8**
"resolves to instruct the Director to...
 - *continue to **survey countries and produce** world and regional reports...*
 - *encourage **countries to collect information** illustrating national digital divides...*
 - *develop **training material** and conduct specialized **training courses** on information society statistics for developing countries..."*

ITU statistical work

- **Collection and dissemination** of telecom/ICT statistics (infrastructure and access, ICT households)
- **Setting standards** (definitions, manuals)
- **Analyses** (global, regional, thematic)
- **Cooperation** (UNSD, MDG, Partnership on Measuring ICT for Development, etc.)
- **Technical assistance** (NSOs, regulators/ministries)

Administrative data: Infrastructure and Access

HOW?

- Annual telecommunication Indicators questionnaire
 - Short questionnaire (March) – 10 indicators
 - Long questionnaire (July) – 100 indicators
- Government agencies responsible for ICT/telecom (regulators or ministries)
- Online research
- Annual reports

WHAT?

- ⊙ Fixed telephone network
- ⊙ Mobile cellular network
- ⊙ Data network
- ⊙ Traffic
- ⊙ Tariffs (fixed, mobile, internet)
- ⊙ Staff
- ⊙ Quality of Service
- ⊙ Revenue & Investment
- ⊙ Community Access
- ⊙ Broadcasting

Challenges: Administrative data

- x Maintaining list of ITU indicators and their definition (to reflect changes in technologies and services while ensuring global applicability)
- x Not all countries return the questionnaires, not all questions get answered
- x More work to aggregate operators' data or operators data/ reports not available
- x Newer telecom/ICT data hard to obtain from developing countries
- x Data received do not meet the ITU definition (subscriptions vs. subscribers)
- x Limitations of administrative data (not able to show usage of ICTs, etc)
- x Time-lag in publishing ICT infrastructure and access data

ICT Use – Limited availability of data

Source: Left chart: ITU World Telecommunication Indicators Database
Note: Data refer to 'latest available data as of 2007'.

March 2009

Committed to connecting the world

Challenges: ICT household statistics

...in developing countries

- ✘ Lack of awareness and cooperation at the national level
- ✘ Lack of capacity and technical expertise to collect ICT statistics
- ✘ Lack of funding to carry out ICT household survey, or to add an ICT module to existing survey

Current members

International level

ITU
OECD
UNCTAD
UNESCO Institute for Statistics
World Bank

Regional level

ECA
ECLAC
ESCAP
ESCWA
Eurostat

**strong institutional commitment
Memorandum of Understanding**

Core list of ICT indicators

Infrastructure and Access (9)
Household and individuals (13)
Businesses (12)
ICT sector and ICT trade (4)
ICT in education (9)

- 40th session of UN Statistical Commission, 24-27 February 2009

Household access and individual use data (ICT Household Survey)

- Proportion of households with:
 - Radio
 - Television
 - Telephone
 - Fixed only
 - Mobile cellular telephone only
 - Both fixed and mobile cellular telephone
 - Computer
 - Internet
 - Type of access
 - Electricity

Household access and individual use data (ICT Household Survey)

- Proportion of individuals who used:
 - Computer
 - Internet
 - By Location of use
 - By Type of Internet activities
 - Frequency of use
 - Mobile cellular telephone

ITU Manual

for Measuring ICT Access and Use by Households and Individuals

2009 Edition

Main objective:

- Assist countries to measure ICT access and use by households and individuals
- Production of high quality and internationally comparable data.
- Released last week

Available online:

<http://www.itu.int/ITU-D/ict/partnership>

Committed to connecting the world

World Telecom/ICT Indicators meeting 2009 (recommendations)

- ✓ Creation of an Expert Group on Telecommunication/ICT indicators
- ✓ Collection of ICT statistics through household surveys based on the internationally agreed core list of ICT indicators
- ✓ To build capacity in ICT household statistics through training courses
- ✓ Further work to be carried out at the national and international level to measure the impact of ICT on socio-economic development
- ✓ Continue collaborative work of the Partnership on Measuring ICT for Development to improve ICT statistics data availability
- ✓ To increase the cooperation between ICT national policy makers in identifying indicators and collecting ICT statistics
- ✓ To synchronize data collection and data dissemination of ICT data

March 2009

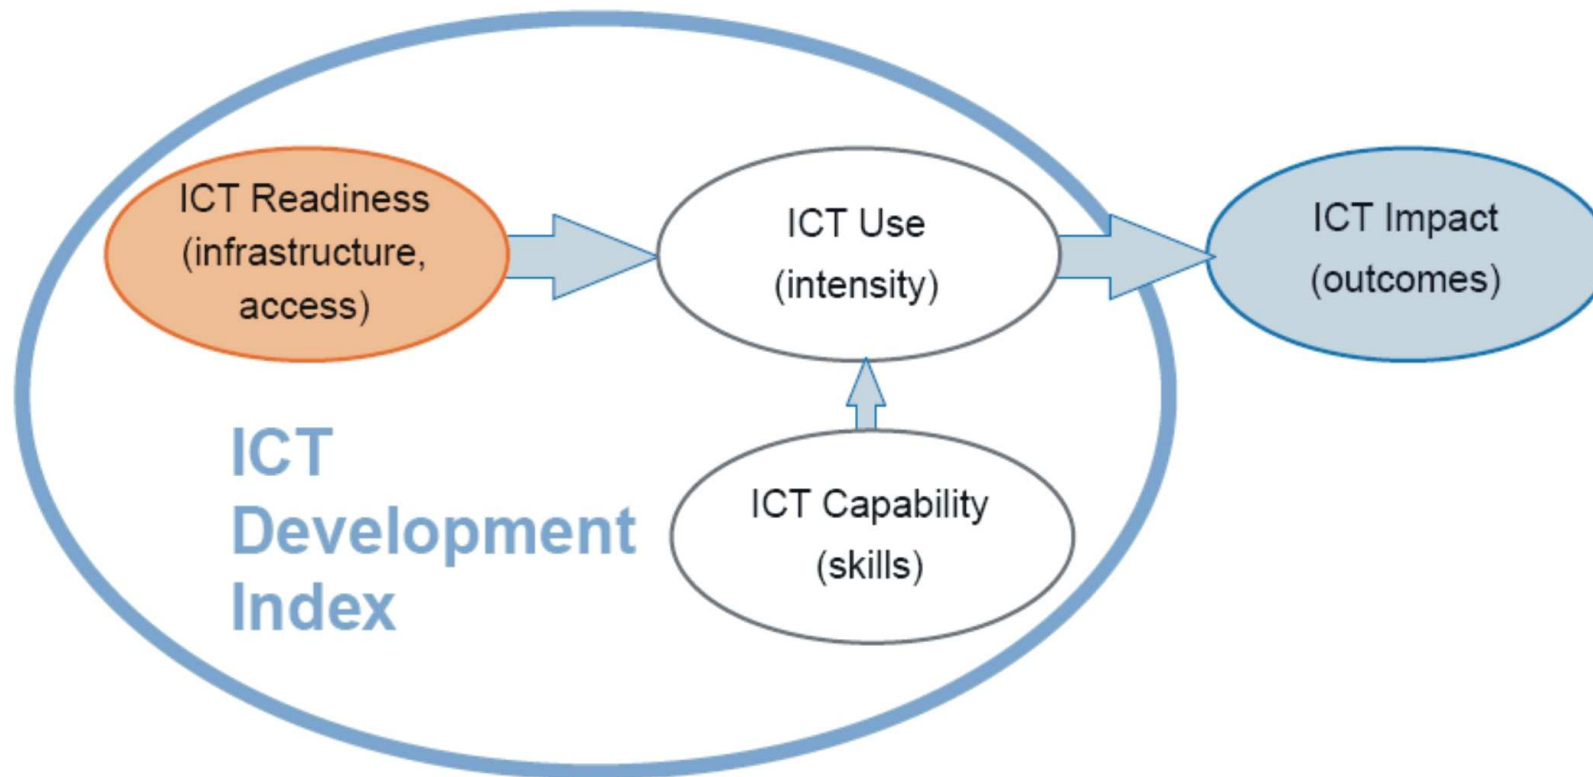

Committed to connecting the world

ICT Development Index (IDI)

- ✓ Track ICT progress *over time*
- ✓ Address all countries - *global* index
- ✓ Measure *digital divide*
- ✓ Capture ICT *development potential*
- ✓ 11 indicators
- ✓ Two years: 2002 and 2007
- ✓ 154 economies
- ✓ Released on 2 March 2009

Three stages in the evolution towards an information society

ICT Development Index

ICT access	Ref. Value	(%)
1. Fixed telephone lines per 100 inhabitants	60	20
2. Mobile cellular telephone subscriptions per 100 inhabitants	150	20
3. International Internet bandwidth (bit/s) per Internet user	100'000*	20
4. Proportion of households with a computer	100	20
5. Proportion of households with Internet access at home	100	20

40

ICT use	Ref. Value	(%)
6. Internet users per 100 inhabitants	100	33
7. Fixed broadband Internet subscribers per 100 inhabitants	60	33
8. Mobile broadband subscriptions per 100 inhabitants	100	33

40

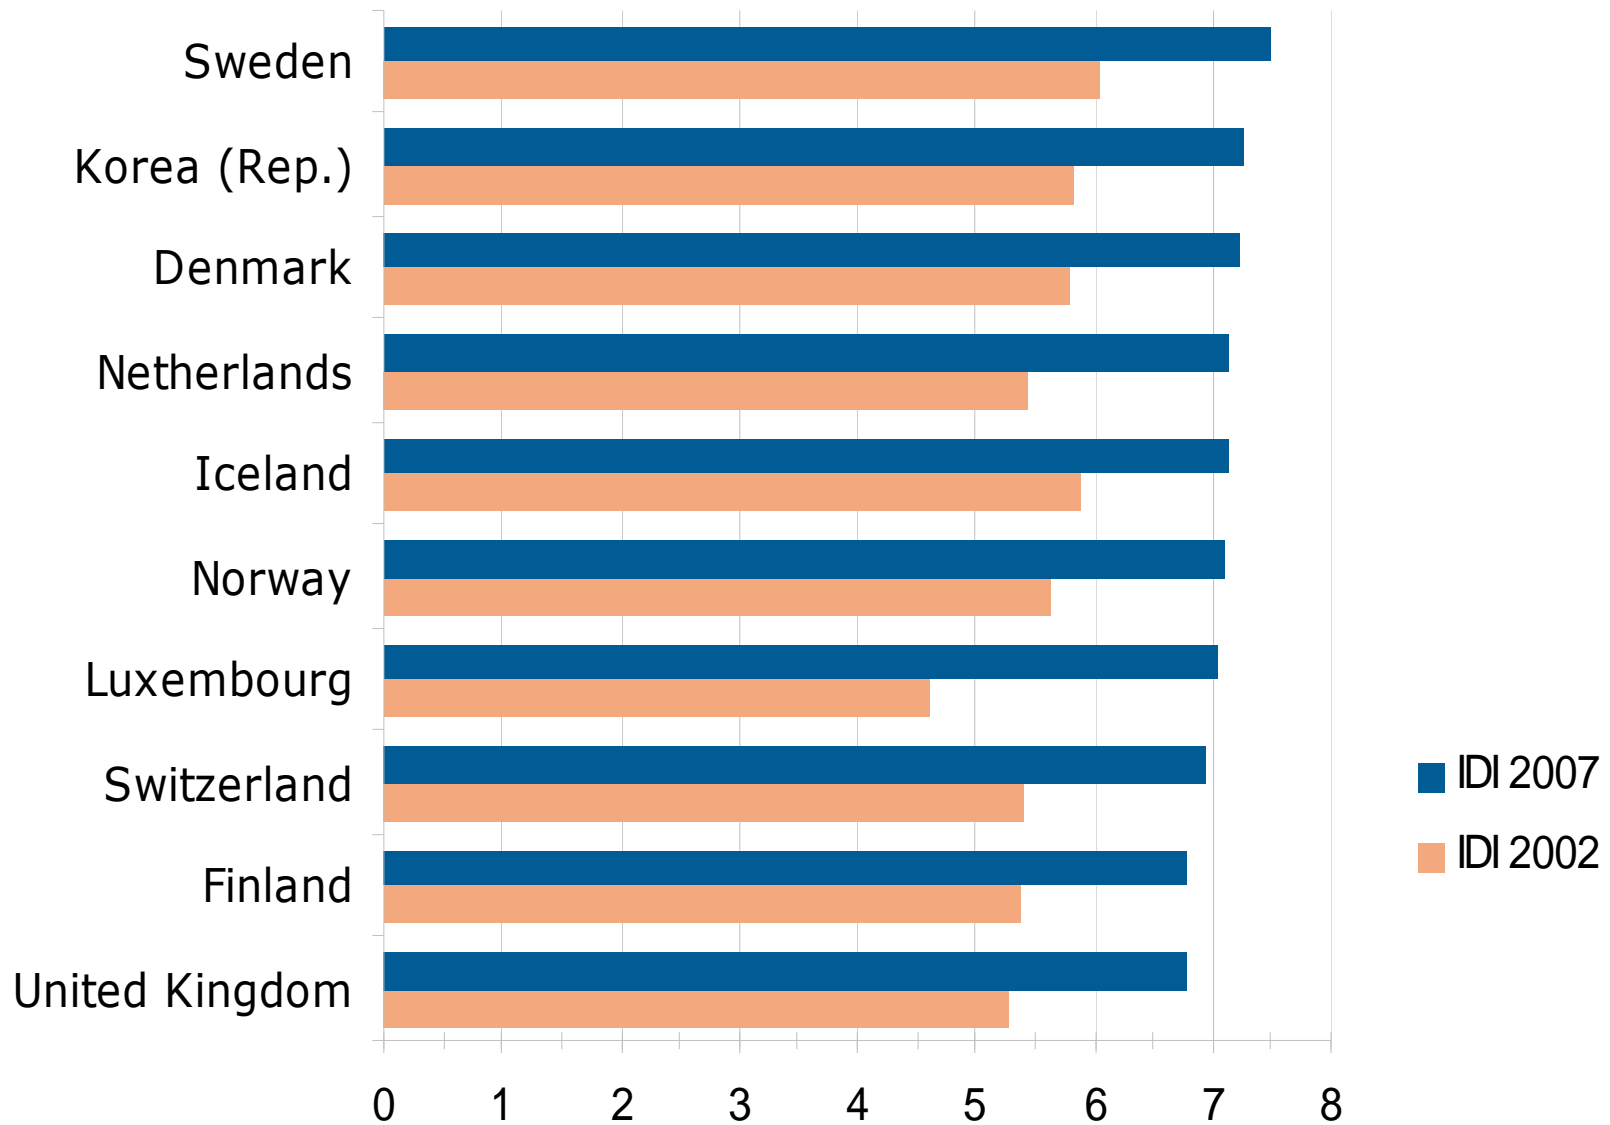

ICT skills	Ref. Value	(%)
9. Adult literacy rate	100	33
10. Secondary gross enrolment ratio	100	33
11. Tertiary gross enrolment ratio	100	33

20

ICT
Development
Index

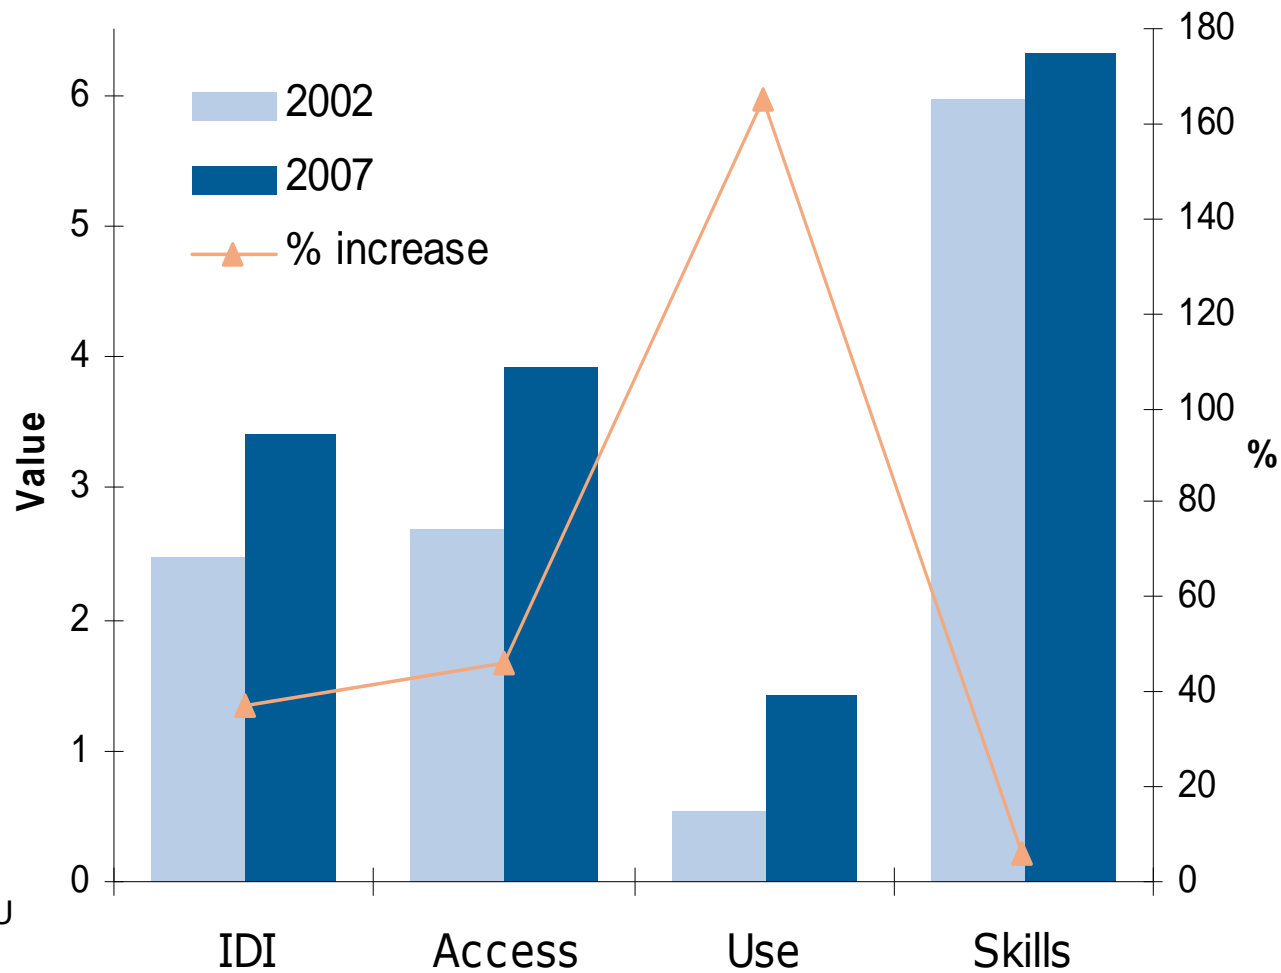

* This corresponds to a log value of 5, which was used in the normalization step.

Top ten IDI countries mainly from Europe

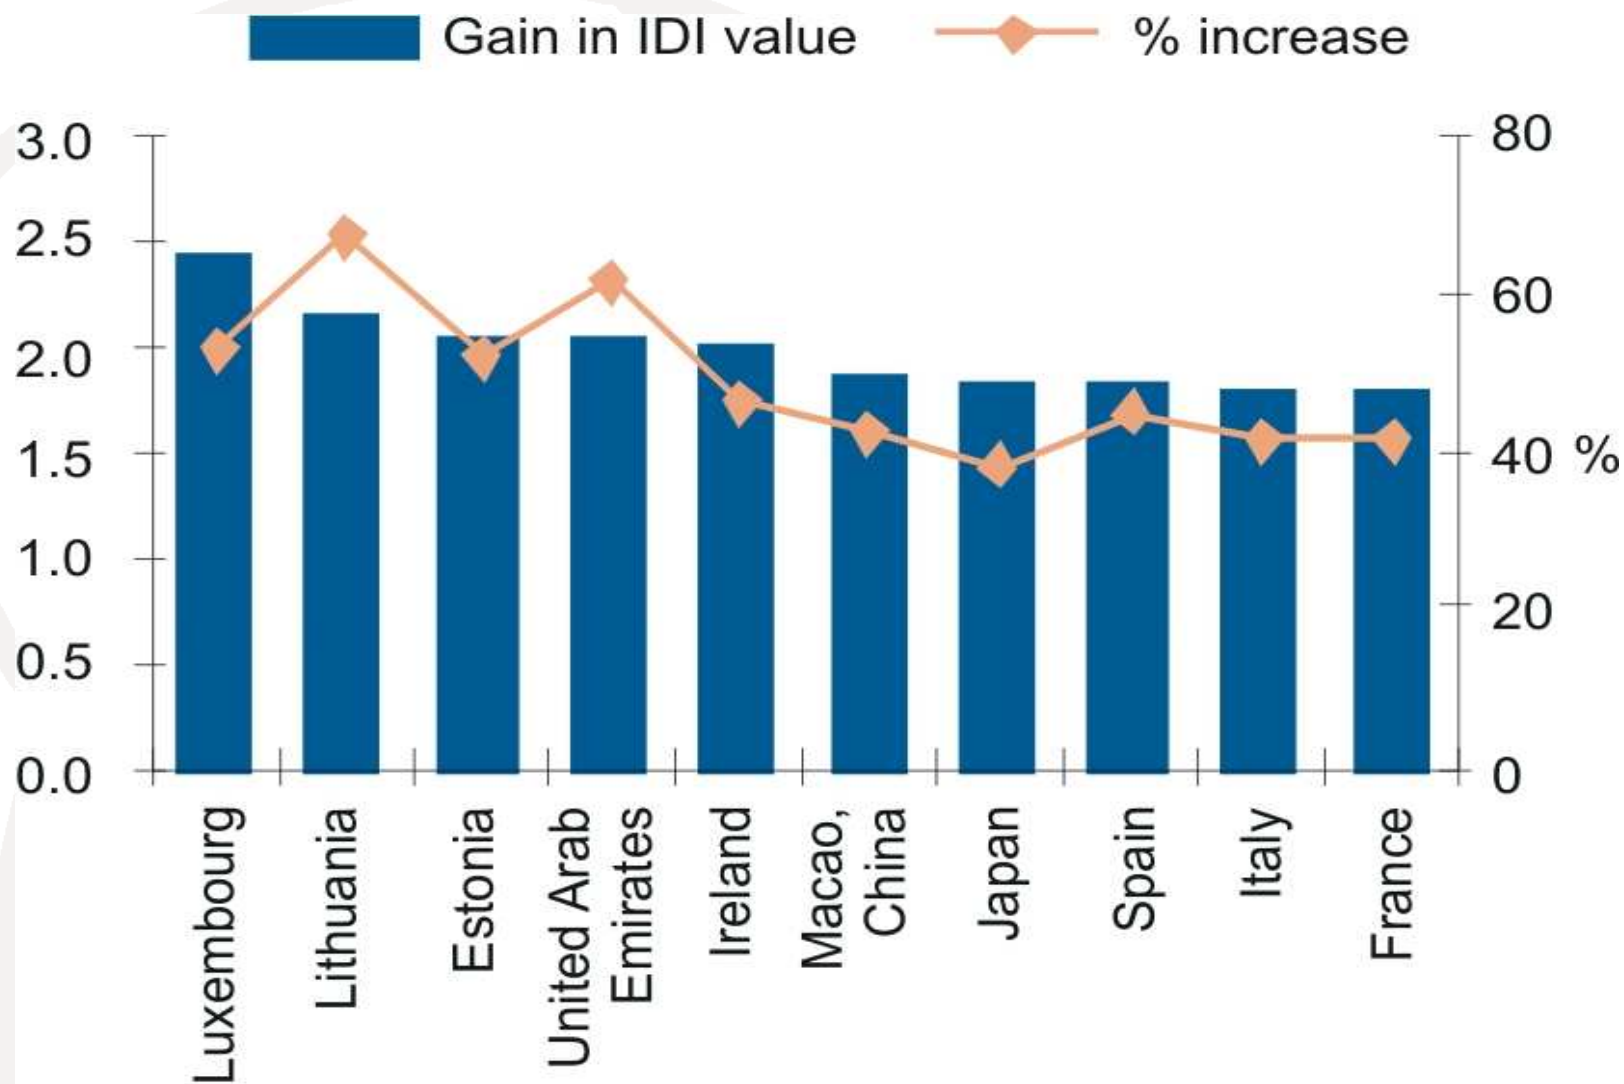

Source: ITU

Biggest relative increase in ICT use, but still low intensity

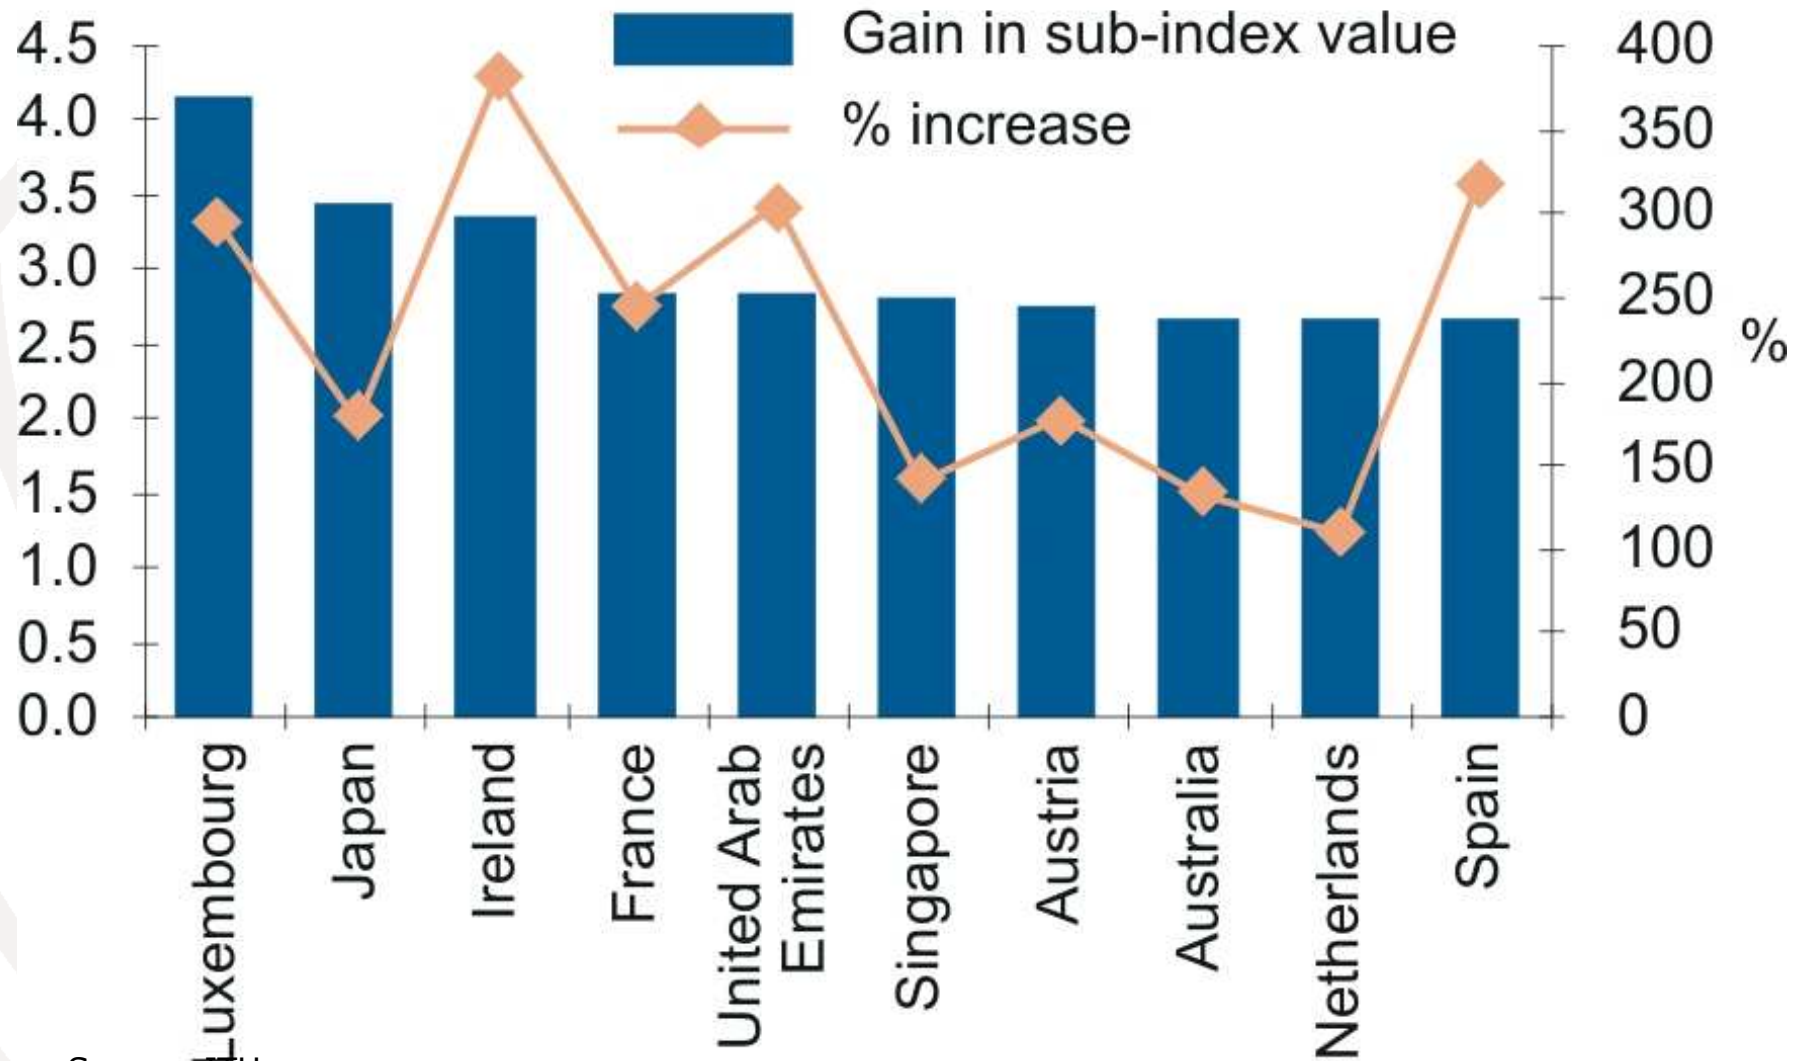

Source: ITU

Economies with highest absolute IDI increases, 2002-2007

But how much do ICT services cost?

The ICT Price Basket

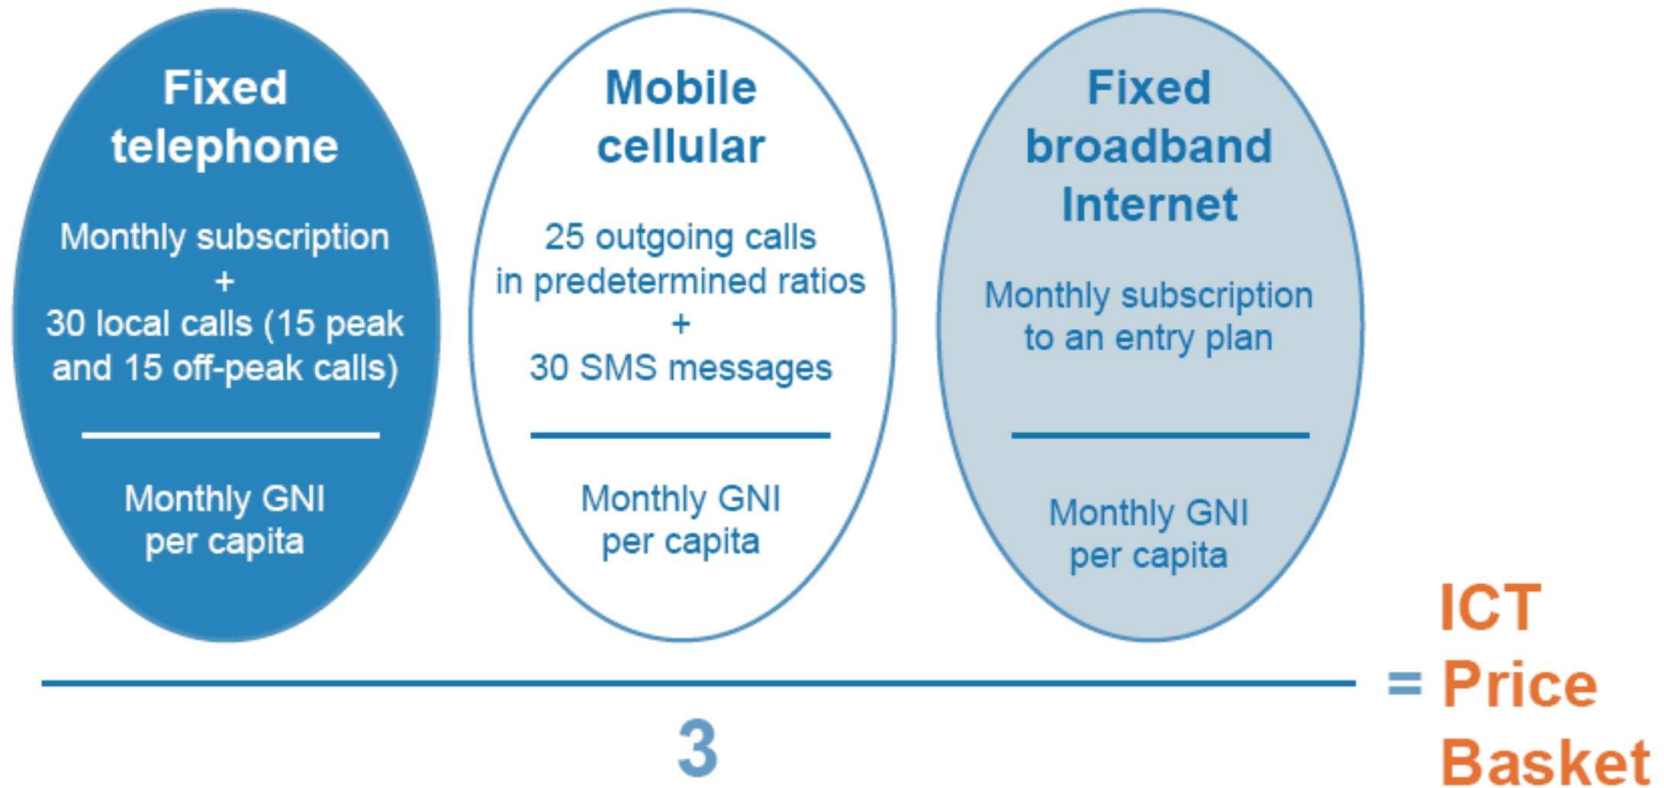

The ICT Price Basket - objectives

- To illustrate, and raise awareness of, the importance of ICT prices for ICT uptake
- To allow policy makers evaluate the cost of ICTs in their countries
- To provide a tool for benchmarking ICT prices globally
- To monitor ICT prices and affordability over time

ICT Price Basket methodology

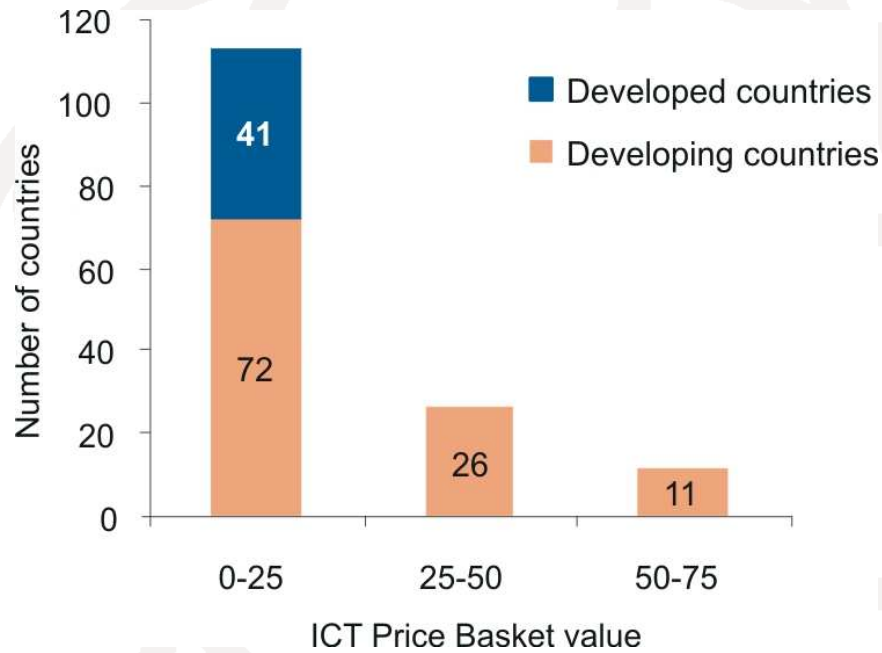

- Three sub-baskets: fixed telephone, mobile cellular, fixed broadband Internet
- Three calculations per sub-basket: US\$, PPP\$, % monthly GNI p.c.
- **Final ICT Price Basket: average of the three sub-baskets (US\$) as % of monthly GNI p.c.**
- 2008 data collected by ITU
