Geneva, 29 June - 1 July 2011

ITU-D TDAG Sync Application v2.0 - User Guide

The ITU-D TDAG Sync Application* allows you to synchronize TDAG documents** from the ITU server to your local drive. It has been configured to access the ITU server in Geneva and synchronize on demand to the latest published documents.

*The ITU Sync Application v2.0 works in Windows® XP/Vista/7.

**TDAG published documents include: Agenda, Contributions, Temporary and Information Documents.

Step 1: Downloading and Starting the ITU-D TDAG Sync Application

1. Download the ITU-D TDAG Sync Application "ITU-D TDAG Sync (2011).exe", from the ITU-D TDAG homepage, to your Windows Desktop:

<http://www.itu.int/ITU-D/tdag/index.html>

2. Once the "ITU-D TDAG Sync (2011).exe" has been downloaded to your Desktop, run the application and accept the ITU License Agreement. Then, enter your TIES account details and choose the default hard drive where you would like to save the documents to.

3. Click the button "Save settings and connect". After a successful verification, these settings will be saved and a prompt to synchronize the documents will be shown.

Notes:

- The Settings window will only be displayed when you run the application for the first time. If you would like to change the settings, just click on the "Settings" button from the main menu.
- It is recommended that you save the Sync Application "ITU-D TDAG Sync (2011).exe" into your Windows Desktop for easy access.

Step 2: Synchronizing ITU-D TDAG Meeting Documents

1. To synchronize, click on the first button, "Synchronize ITU-D TDAG Meeting Documents".

2. Synchronize is then launched.

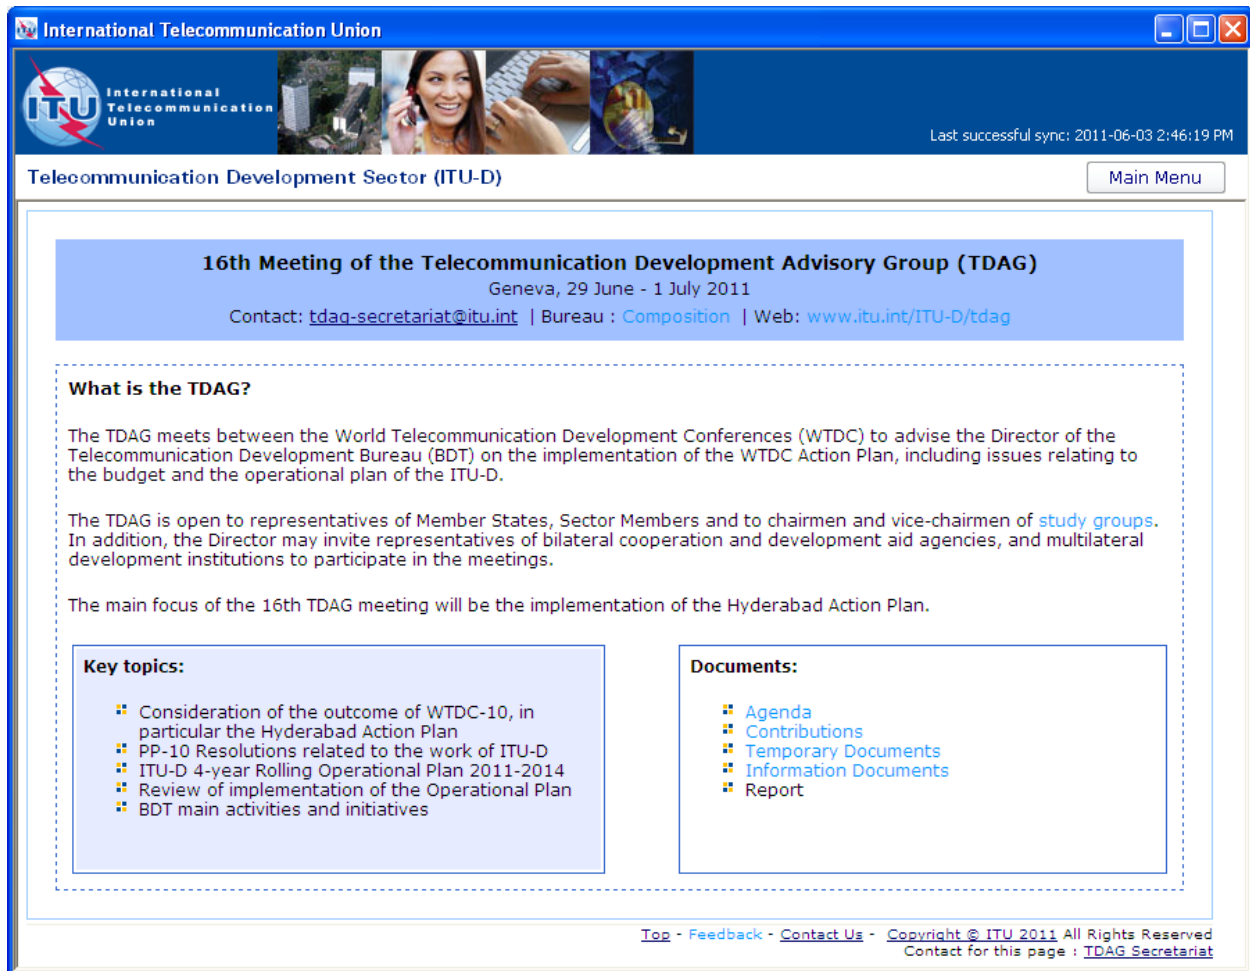

Notes:

- In the initial synchronization, it may take several minutes to download and synchronize all published documents.
- Synchronization is set to run on demand; you may launch it at any time from the menu by clicking on the "Synchronize...documents" button.

Step 3: Accessing ITU-D TDAG Meeting Documents

1. Click on "Access Meeting Documents" to show the Contents page. This menu will give you access to the documents that were downloaded and synchronized to your hard drive.

The screenshot shows a web browser window with the title "International Telecommunication Union". The page header includes the ITU logo and the text "Telecommunication Development Sector (ITU-D)". A "Main Menu" button is visible in the top right corner. The main content area features a blue banner for the "16th Meeting of the Telecommunication Development Advisory Group (TDAG)" held in Geneva from 29 June to 1 July 2011. Below the banner, there is a "What is the TDAG?" section with three paragraphs of text. To the left, a "Key topics:" box lists five bullet points. To the right, a "Documents:" box lists five links: Agenda, Contributions, Temporary Documents, Information Documents, and Report. At the bottom, there is a footer with navigation links: "Top - Feedback - Contact Us - Copyright © ITU 2011 All Rights Reserved" and "Contact for this page : TDAG Secretariat".

What is the TDAG?

The TDAG meets between the World Telecommunication Development Conferences (WTDC) to advise the Director of the Telecommunication Development Bureau (BDT) on the implementation of the WTDC Action Plan, including issues relating to the budget and the operational plan of the ITU-D.

The TDAG is open to representatives of Member States, Sector Members and to chairmen and vice-chairmen of [study groups](#). In addition, the Director may invite representatives of bilateral cooperation and development aid agencies, and multilateral development institutions to participate in the meetings.

The main focus of the 16th TDAG meeting will be the implementation of the Hyderabad Action Plan.

Key topics:

- Consideration of the outcome of WTDC-10, in particular the Hyderabad Action Plan
- PP-10 Resolutions related to the work of ITU-D
- ITU-D 4-year Rolling Operational Plan 2011-2014
- Review of implementation of the Operational Plan
- BDT main activities and initiatives

Troubleshooting: First-time use

1. This window may appear the first time you use the program. Click on the "Unblock" button to continue. Synchronization is then launched. The application synchronizes the USB key by adding new files or replacing modified files.

If synchronization of documents does not start

1. Go to "Control Panel".
2. Run Windows Firewall.
3. Select the "Exception" tab and enable "Display notification when Windows Firewall blocks a program".

4. Click the "OK" button to close.
5. Run "Synchronize Documents" from the menu.
6. The Windows Security Alert (see below) may appear if the Windows Firewall is blocking the program. Click the "Unblock" button to continue. This will probably solve the problem.

7. Check if synchronization begins. If it doesn't, check if other factors, such as antivirus programs or the server, are blocking the program. One way to check is to run the sync program outside your organization.

If you experience problems in accessing or synchronizing documents, please contact our IT assistance and support service by calling the Conference Helpdesk service.
