

Dr. Li Wanlin

Vice Chairman of TD-SCDMA Forum and CTO of Siemens China Mobile

"The development of 3G standard TD-SCDMA and TD-SCDMA Forum"

Duration: 40 minutes

Abstract:

As one of the IMT-2000 family standards, TD-SCDMA was proposed by China and specified and endorsed by ITU-R. TD-SCDMA is a world standard and has its unique significance because it was the first time in the over 100 years Chinese telecom history, that China as a developing country submitted and specified a standard and got it approved by ITU-R. This presentation will give an introduction about the current development of TD-SCDMA technology, product and market. Besides TD-SCDMA Forum as the platform to promote TD-SCDMA will be introduced.
