

McWiLL Tech

Chen Wei

Chen Wei, CEO of Xinwei Telecom, was a Staff Engineer of Semi-conductor Division of Motorola in Austin, Texas, from 1990 to 1994, engaging in the research on the applications of DSP. In 1995, he founded Cwill Telecommunications, Inc., as Chairman and CEO. In November 1995, Cwill and China Academy of Telecommunication Technology(CATT) jointly setup Beijing Xinwei Telecom Technology Co.,Ltd. As one of founders, Dr. Chen has taken CEO and vice chairman of board since then. Up to date, Beijing Xinwei has nearly 1, 600 employees.

Dr. Chen was one of the major technical contributors for SCDMA technology. The TD-SCDMA, based on SCDMA, was accepted by ITU as a standard for 3G mobile communications.

Dr. Chen has led his team successfully deployed SCDMA wireless access system in large scale and make it a first commercialized wireless standard in China.
