

## **ITU Seminar**

### **“Introduction to Legal, Technical and Economic Aspects of Wireless Systems”**

*13-14 November, 2008,*

*Tashkent, Uzbekistan*

During the period from 13 to 14 November, 2008, the Seminar “Introduction to Legal, Technical and Economic Aspects of Wireless Systems” was held in Tashkent, Uzbekistan. This event was organized in collaboration with the Regional Commonwealth in the field of communications at the kind invitation of the Communications and Information Agency of Uzbekistan and hosted by Open Joint-Stock Company “Uzbektelecom”. The seminar was organized in tandem with the meeting of the RCC Operators’ Board and Telecommunications Commission (11-12 November). During the opening Mr Sh.M. SADYKOV, Director General of Uzbektelecom, addressed the participants with a speech of welcome.

The seminar focused on the following subjects: legal aspects in regulation of wireless data transmission networks, evolution of wireless access systems, trends in radiocommunication systems development; wireless systems accounting, planning and monitoring, satellite communication systems, experience of participating countries in introduction of wireless access systems.

The seminar gathered together 60 representatives of ITU Member-States, private sector companies, research, frequency management and educational organizations from 8 CIS countries (Armenia, Azerbaijan, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Uzbekistan) and RCC Executive Committee).

Seminar was carried out in Russian language.
