

Session 3

Follow-up of the co-primary allocation in Region 1 of the band 790-862 MHz to the mobile service at WRC-07 - An overview of initiatives within CEPT

Following the co-primary allocation of the band 790-862 MHz to the mobile service in Region 1 at WRC-07 Europe started several activities. Some of these activities aim at setting a (least restrictive) framework for spectral occupation characteristics of the mobile/fixed applications which could newly be operated in this band. Other activities search for alternatives in terms of spectrum for the existing applications ancillary to broadcasting (PMSE) and possibilities for administrations to compensate losses of broadcasting coverages in the GE06 Plan due to this new allocation. Lately the issue of cognitive radio systems (CRS) became also very tangible in Europe in the UHF band.
