

Cybersecurity, ITU-T standards and initiatives:

Abstract: The presentation reviews the standardization process for cybersecurity in ITU-T as part of its overall telecommunication/ICT security standardization activities - complementing the work progressed by the two other ITU Sectors, ITU-D and ITU-R and by the General Secretariat of ITU. In particular, the context of those activities is reminded. New initiatives initiated by ITU-T following WTSA-08 decisions are introduced as well as the status of the related work.
