Co-primary allocation of the 790-862 MHz band to the Mobile service in Region 1 at WRC-07 - Follow-up activities in Europe

WRC-07 decided to allocate the 790-862 MHz band to the Mobile service on a co-primary basis in Region 1. Once the conference ended, this decision generated several initiatives in European frequency management fora. This presentation aims at giving an overview of these initiatives and, if already available, outline some of the outcomes.
