

**ITU-D Regional Development Forum for
the Europe and CIS Region**
“NGN and Broadband, Opportunities and Challenges”
Chisinau, Moldova, 4-6 May 2010

**WTSA-08 Resolution 76:
Conformance and Interoperability**

Georges Sebek,
Counsellor
ITU/TSB

The content

1. Background of WTSA-08 Res. 76
2. Conformity
3. Interoperability
4. ITU-T Study Groups and JCA-CIT
5. Assistance to Developing Countries
6. Conclusions

1

Background of WTSA-08 Resolution 76

INTEROPERABILITY

The most complex project ever implemented by mankind is arguably the phone network.

The 7-any resources for
anywhere, anytime, anybody, for anything, with
any equipment for any data-voice-video using
any network-type (PSTN or IP)

**It couldn't have been done without
interoperable standards of ITU**

Why ITU-T WTSA-08 Resolution 76

- Major concerns were raised at WTSA-08, especially from developing countries, due to lack of performance and of compliance to conformity requirement and interoperability
- Market invaded by counterfeit products
- Need of developing countries to be assisted in deploying testing facilities and in capacity building opportunities in the regions
- Other standards bodies, as well as forums and consortia, have already introduced a number of activities to address conformity and interoperability and are far ahead of ITU.

TSB Director's Recommendations endorsed by the Council-09

1. The implementation of the proposed conformity assessment programme
2. The implementation of the proposed interoperability events programme
3. The implementation of the proposed human resources capacity building
4. The implementation of the proposed recommendations to assist establishment of test facilities in developing countries

Council further agreed that the TSB Director should report to the next Council on the implementation of these recommendations. This report provides a summary of follow-up activities since Council-09.

2

Conformity

Ability of a product to meet the requirement(s) of a standard.

A first step to increase the probability of interoperability

Conformity assessment

Industry issues:

- Increasing business opportunities
- time to market, costs for testing
- Increase of market outreach thanks to Mutual Recognition Agreements and Arrangements, no TBT issues)

➤ End users issues:

- Requirements for Quality of Service
- Interoperability and legacy to existing infrastructure
- Costs for non conformity & non interoperability

The ITU Pilot Conformity Database: fundamental concepts

- **Voluntary basis & free** programme open to ITU members. Non-members may participate on a case by case basis
- **Testing**
 - 1st , 2nd , 3rd party accredited labs conformity assessment
 - 3rd party accredited certifiers
- **Supplier's Declaration of Conformity (SDoC)** (ISO/IEC 17050)

ITU-T Pilot Conformity Database

- **The vendor:** visibility in the marketplace of products conform to ITU-T Recommendations
- **The ITU-T Study Groups:** develop Recommendations with a view to conformity and interoperability testing, increasing quality of standards
- **Customers:** easy finding of conform products

The ITU Pilot Conformity Database:

- Company name
- ITU product code **C-1234567**
- Product name
- Product Category
- ITU-T Recommendations
- Standards by ITU-T A.5 recognized SDOs, Forums and Consortia (normative ref)
- Supplier's Declaration of Conformity
- Search facilities
- Others...

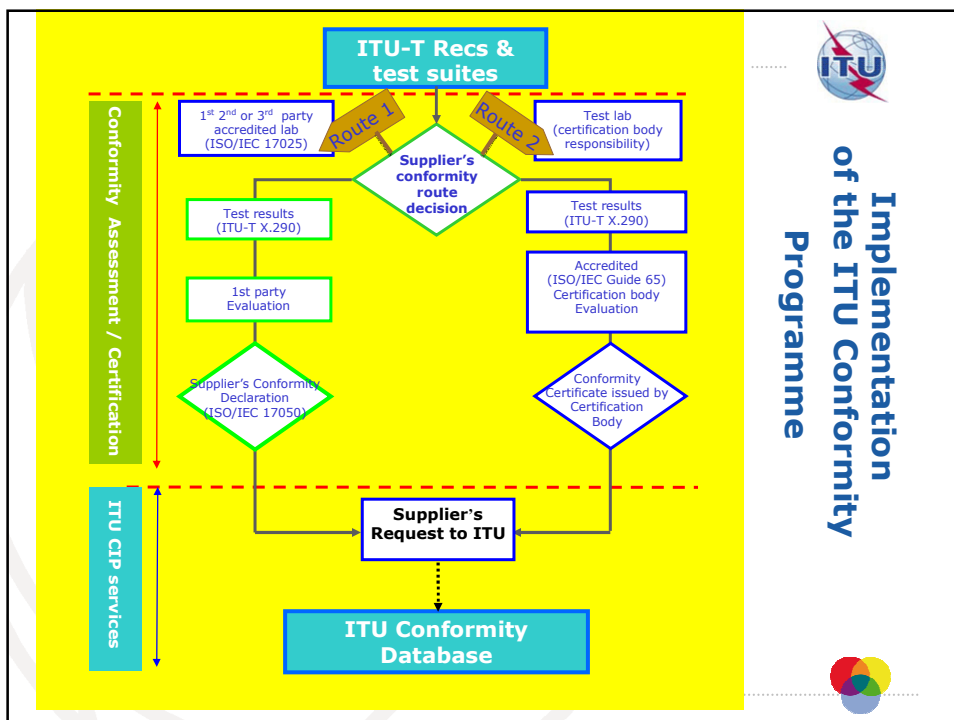

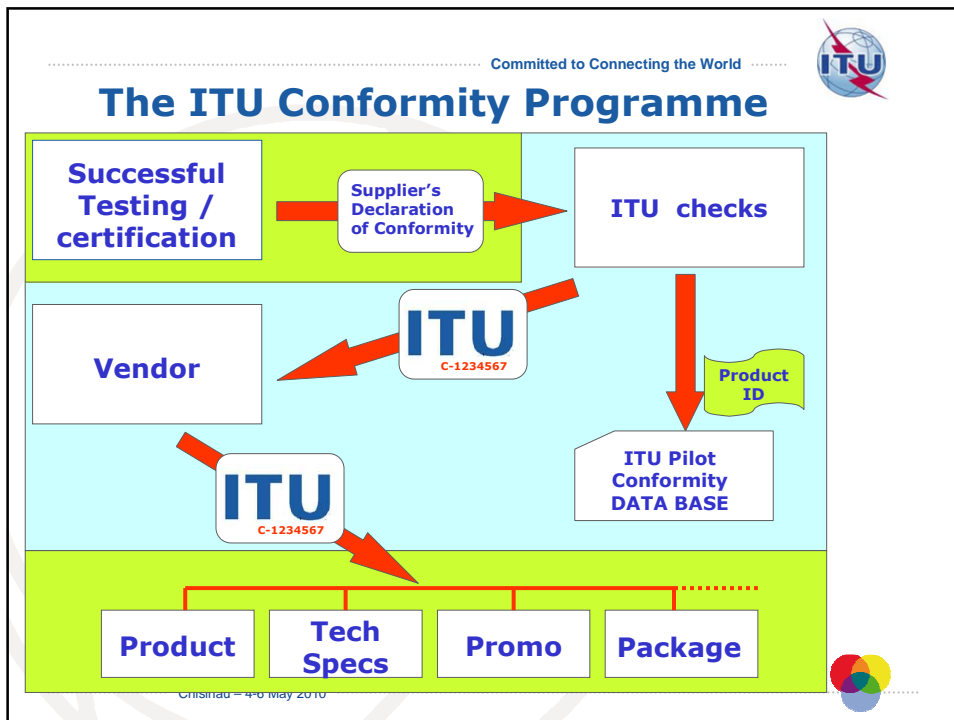

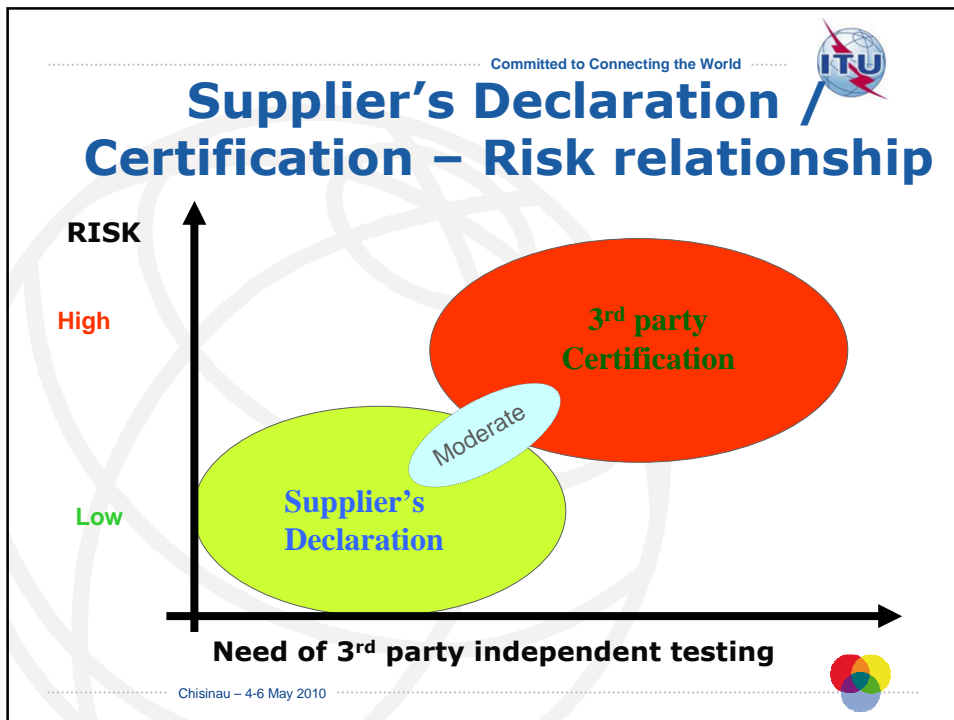

Supplier's Declaration of Conformity (ISO 17050-1)

<http://www.itu.int/net/ITUT/cdb/Default.aspx>

- Product category & Name of product
- ITU-T Recs and standards from Rec. ITU-T A.5 entities implemented
- Testing in accredited labs or through a 3rd party certifier
- Acceptance of liability for the Supplier's Declaration of Conformity

International Telecommunication Union

Product Registration

Please complete the information requested in each field below. One may advance by tabbing from field to field. Once completed, click on the button below to **download for signature, SIGN and SCAN** completed form and send by E-Mail to: tsbconformity@itu.int

3

Interoperability

Ability of two or more systems or applications or network management products and services from different suppliers to exchange information and to mutually / fruitfully make use of it

Interoperability initiatives

- TSB facilitator and co-organizer, calendar of interoperability events & partnership with relevant SDOs/forums/consortia
- Possible hot topics:
 - G.9960 (Home Networking); HomeGrid Forum
 - VDSL; Broadband Forum
 - GPON (Gigabit-capable Passive Optical Network)

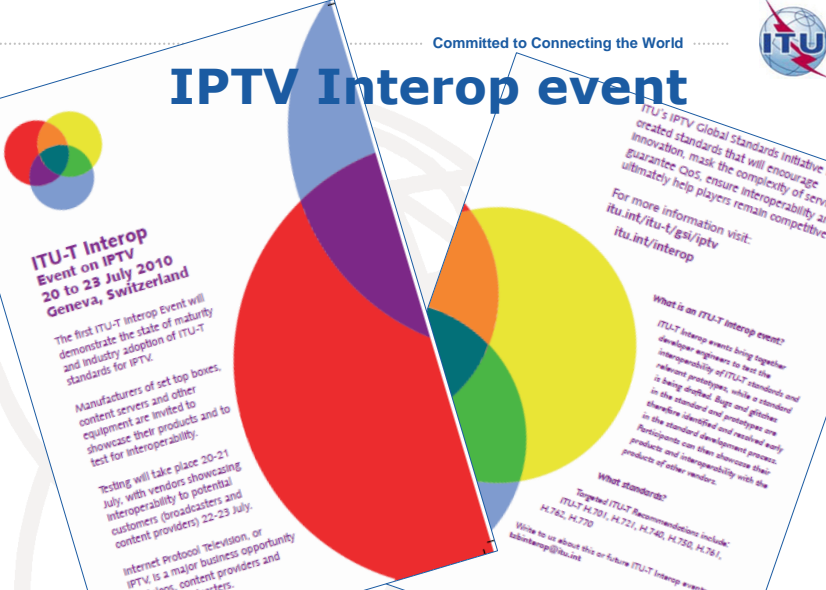

Interested Companies SDOs, Forums, Consortia contact TSB (interop@itu.int).

Committed to Connecting the World

IPTV Interop event

ITU-T Interop Event on IPTV
20 to 23 July 2010
Geneva, Switzerland

The first ITU-T Interop Event will demonstrate the state of maturity and industry adoption of ITU-T standards for IPTV.

Manufacturers of set top boxes, content servers and other equipment are invited to showcase their products and to test for interoperability.

Testing will take place 20-21 July, with vendors showcasing interoperability to potential interopability to potential customers (broadcasters and content providers) 22-23 July.

Internet Protocol Television, or IPTV, is a major business opportunity for telcos, content providers and existing broadcasters.

ITU's IPTV Global Standards Initiative has created standards that will encourage innovation. It asks the complexity of services, guarantee QoS, ensure interoperability and ultimately help players remain competitive.

For more information visit:
itu.int/itu-t/gsi/iptv
itu.int/interop

What is an ITU-T Interop event?

ITU-T Interop events bring together developer engineers to test the interoperability of ITU-T standards and to bring drafted, bugs and glitches in the standard and prototypes are therefore identified and resolved early in the standard development process. Participants can also showcase their products and interoperability with the products of other vendors.

What standards?

Targeted ITU-T Recommendations include H.762, H.770, H.721, H.740, H.750, H.761, H.762, H.770

Write to us about this or future ITU-T Interop events at tbltemp@itu.int

Chisinau – 4-6 May 2010

Committed to Connecting the World

ITU-T Interop Event on IPTV, Geneva, 20-23 July 2010

- Study Groups developed a consistent set of technical specifications or standards under the umbrella of the IPTV Global Standards Initiative (IPTV-GSI).
- The first IPTV Interop event will demonstrate the state of maturity and industry adoption of ITU-T standards for IPTV, for example: H.701,H.721,H.740, H.750, H.761,H.762,H.770. Manufacturers of set top boxes, content servers and other equipment are invited to showcase their products and test for interoperability
- The event will be held:
 - From: Tuesday 20 July to Friday 23 July 2010
 - Outline Programme:
20-21 July - Conformity and Interoperability Testing
22-23 July - Showcasing

Chisinau – 4-6 May 2010

4

ITU-T Study Groups and JCA-CIT

The ITU-T

- **ITU Recommendations**
 - truly global in nature respecting of openness, transparency and non-discrimination, as recognized in international agreements.”

- **Conformity assessment and Interoperability**
 - Cost effective solutions able to meet both the needs of vendors and of customers

TSB studies in progress with...

- Experts and External Organizations
- IEC, ISO,
- Regulators,
- Laboratories,
- Training institutions
- Governments
- UNIDO, WTO
- Accreditation bodies (ILAC, IAF, BIPM)
- Private sector, members and non-members of ITU

The ITU-T Study Groups

- More efforts in preparing Recommendations in view of Conformity Assessment and Interoperability testing
- Maintain a list of Recommendations where test suites already available from ITU or other SDOs, Forums or Consortia or to be produced

Regional Consultation Meetings 2010

- Americas – 6 July, Quito, Ecuador
- Briefing in Brasilia 3rd week July (planned)
- Africa – Nairobi, Kenya (planned)
- Asia Pacific – September – (Sydney, Australia ?)

Objectives:

- Continue the discussion to better implement the action lines adopted by Council-09 and the Conformity and Interoperability programme
- Improve the ITU pilot conformity database addressing needs of developing countries

Contents Consultation meetings

Discussions also based on contributions:

- Why Conformity and Interoperability ?
- Resolution 76 : a short review
- The action lines decided by the Council-09
- Impact on developing countries: benefits of the ITU C&I Programme, costs of lack of conformity and/or interoperability
- Impact on industry, testing, MRAs, associated costs, time to market
- Improvements to the ITU pilot database
- Encouraging interoperability testing

Audience

- Industry / Vendors
- Administrations
- Operators/service providers
- Standards developers
- Regulators
- Laboratories
- **Civil society**

ITU-T Joint Coordination Activity on Conformity and Interoperability Testing (JCA-CIT)

- To facilitate information sharing and collaboration with the participation of ITU-T Study Groups experts and relevant outside bodies such as ETSI, ISO and OMA.
- Seeking of input with regard to the implementation of tasks stated in WTSA-08 Resolution 76
- Development of a common understanding of Conformance vs. Interoperability testing
- Developing a roadmap for the implementation of the four action lines agreed by the Council-09 and taking into account a draft action plan developed by TSB (live document)

5

Assistance to Developing Countries: Capacity Building and Test Centres

Capacity building and test centers

- The ITU-T Secretariat (TSB) is implementing implement proposals on human capacity building in close collaboration with the ITU-D Secretariat (BDT):
 - assign more resources
 - hold workshops and tutorials on conformity assessment and interoperability on the BDT project on International Telecommunication Testing Center.
- The ITU-T will assist in the establishment of test facilities in developing countries and in cooperation with international institutions is planned (UNIDO, International Laboratory Accreditation Cooperation - ILAC, International Accreditation Forum - IAF,...)
- A project is in progress to establish a test center in Tanzania

6

Conclusions

What we said

- **Resolution 76 : the reply to the needs of Developing Countries**
- **Conformity to increase probability of interoperability**
- **Created the voluntary based and free pilot conformity database to be populated since now**
- **ITU-T interop events started**
- **TSB committed to the implementation of the Res. 76 requirements**
- **Capacity Building activities and creation of test centers started in cooperation with the BDT**

Addressing interoperability is one of the very reasons for founding ITU

Study Groups and Membership engaged in producing Recommendations suitable for testing

“there is no point in developing test suites if ITU does not give some recognition to manufactures having their equipment tested to ITU-T Recommendations”

Thank you

conformity@itu.int
interop@itu.int

**Additional
slides**

WTSA-08 Resolution 76

“Studies related to conformance and interoperability testing, assistance to developing countries, and a possible future ITU mark programme”

Res.76: instructs the Director of TSB

- in cooperation with BR and BDT, to **identify and prioritize the problems** faced by developing countries related to achieving interoperability of ICT equipment and services
- to study the **overall effect on ITU and manufacturers, legal, national and international regulatory implications**, cost of set up and location of testing facilities, measures to build the necessary human resource capacities
- to carry out the **necessary studies**, also involving experts and external entities, with the **view to introduce the use of ITU Mark** as a **voluntary programme** permitting manufacturers and service providers to make a **visible declaration** that their equipment conforms to ITU-T Recommendations and to study the relevant financial and legal implications for the ITU-T and ICT industries
- to submit the **result of these studies to Council-09** for its consideration and required actions

Council-09 endorsement:

- 1. The implementation of the proposed conformity assessment programme
- 2. The implementation of the proposed interoperability events programme
- 3. The implementation of the proposed human resources capacity building
- 4. The implementation of the proposed recommendations to assist establishment of test facilities in developing countries
- Council further agreed that the TSB Director should report to the next Council on the implementation of these recommendations. This report provides a summary of follow-up activities since Council-09.
