

**ITU Forum on Conformance and  
Interoperability  
for the Arab and African regions  
*Tunis, Tunisia, 5-7 November 2012***

**Organization and Activities of a  
Test lab**

**Denis Andreev**  
Programme coordinator of TSB

**Contents**

- 1. The international experience of Test Lab (best practice)**
- 2. The effective strategy of standardization and verification (testing)**
- 3. The role of International telecommunication testing center (ITTC) – Test Lab**
- 4. ITTC tasks**
- 5. The typical work plan for building ITTC**
- 6. The ZNIIS experience in ITTC activities**
- 7. Conclusion**

## 1. The International experience of Test Lab

### The purpose of existing international testing centers

- **Verification equipment and services on conformity against internal requirements** by operator or ISP (enterprise standards)
- **Interoperability testing** for understanding compatibility equipment that will be installed to ISPs existing network
- **Preliminary testing of new technologies and services (try-and-buy)**. Determination the effective business's and operation's strategy of ISP

ITU Forum on Conformance and Interoperability for the Arab and African regions  
Tunis, Tunisia, 5-7 November 2012

## 1. The International experience of Test Lab

### The type of testing centers and their tasks

- **ISP and vendor private labs** (DT – Systemqualifizierung; BT – 21CN "ON THE NIGHT") (own – operator or vendor)  
**Purposes:** testing on conformity to operator's/vendor's requirements (services, equipment performance, interoperability features)
- **Testing against requirements of the network operator community** (Technische und betriebliche Fragen der Nummerierung und Netzzusammenschaltung) (3-rd party)  
**Purposes:** testing on conformity to requirements of community, interoperability testing
- **Testing against SDOs requirements** (ETSI PLUGTESTS, ITTC end etc.) (3-rd party testing)  
**Purposes:** testing on conformity against international standards and recommendations

ITU Forum on Conformance and Interoperability for the Arab and African regions  
Tunis, Tunisia, 5-7 November 2012

## 1. The International experience of Test Lab

### The typical approaches of equipment choice

- **Building the MODEL NETWORK** (architecture, set of services similar to the existing network – but with low performance) where applicable different opportunity for preparation local standards and testing from conformity/interoperability till testing of new technologies upcoming to the network
- **Developing Request for Proposal (RFP)**, which include all requirements: network architecture, equipment functionality, protocol realization including call flow (the average RFP 300-400 pages)
- **Initiating regulation process like EU via Directive of EC** (in case if a new services are appear which are not standardized by ETSI a ISPs launch the process for standardization thought ETSI the interfaces and services with purpose to reduce costs of equipment for European network operators)
- **Development enterprise's program and test specifications**

## 1. The International experience of Test Lab

### ISP's stages of equipment choice

**Stage 1 - Preliminary selection of equipment on global criteria** (type of equipment, performance, scalability, state of distribution, reservation, stability and etc.) and their possible realization on the ISP network

**Stage 2 - Preparation of winner's MODEL NETWORK in accordance with requirements of developed RFP** (equipment conformity against operator's requirements and compatibility of equipment with the existing operator equipment (Software/Patches)

**Stage 3 - Updating the equipment and final testing on ISP's services conformity** (service as a product for the customer)

## 1. The International experience of Test Lab

### The common lack of existing conformity assessment methods

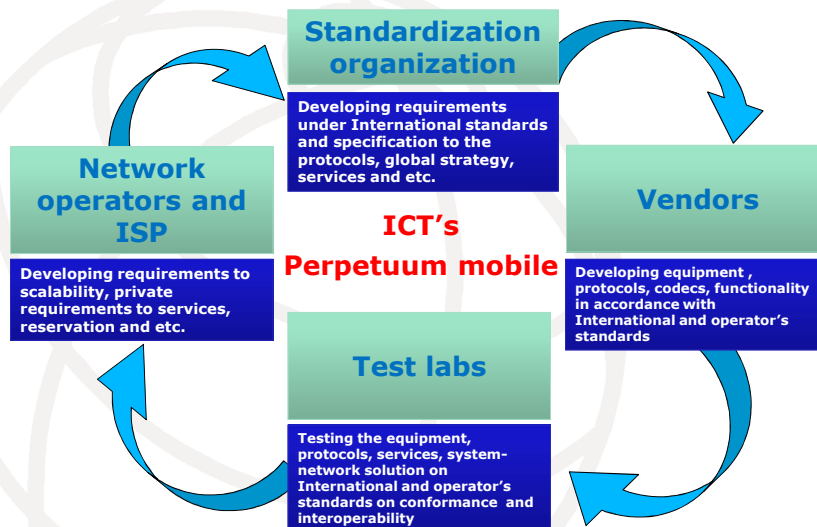

- **Costly process** and capital investments could not be refunded fully
- **The unified approach of conformity assessment of network facilities/features is absent** (often uses private strategy and private network solutions)
- **The private conformity assessment procedure could not be distributed** for other players and in general it covers just only narrow tasks of present ISP

ITU Forum on Conformance and Interoperability for the Arab and African regions  
Tunis, Tunisia, 5-7 November 2012

## 2. The effective strategy of standardization and verification (testing)

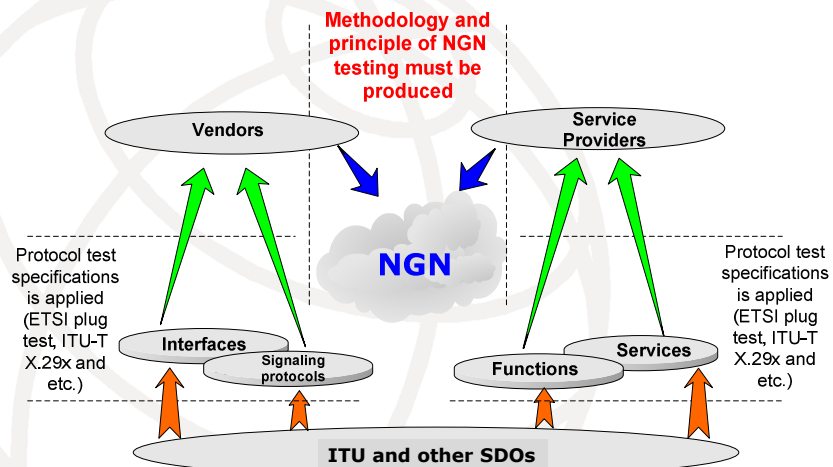

### The list and tasks of key players of process

ITU Forum on Conformance and Interoperability for the Arab and African regions  
Tunis, Tunisia, 5-7 November 2012

## 2. The effective strategy of standardization and verification (testing)

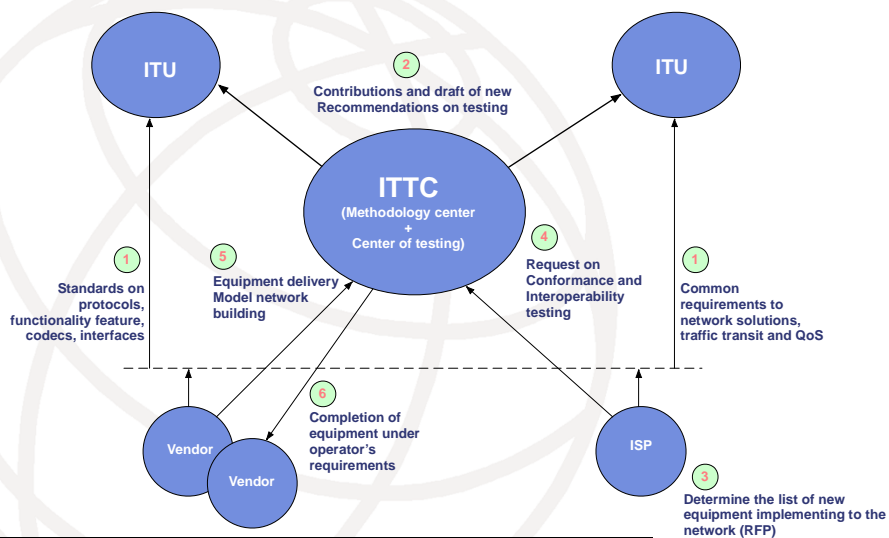

### The scheme of ICT players interaction

ITU Forum on Conformance and Interoperability for the Arab and African regions  
Tunis, Tunisia, 5-7 November 2012

## 2. The effective strategy of standardization and verification (testing)

### The typical process of interaction

ITU Forum on Conformance and Interoperability for the Arab and African regions  
Tunis, Tunisia, 5-7 November 2012

### 3. The role of International telecommunication testing center (ITTC) – Test Lab

#### The actuality

- **Unified and test network solutions for Region** (equipment requirements, special requirements to services and QoS)
- **Reducing the cost of testing** (sharing the testing fees among Region's ISP)
- **Assessment of equipment's high performance conditions** (benchmarking)

---

ITU Forum on Conformance and Interoperability for the Arab and African regions  
Tunis, Tunisia, 5-7 November 2012

### 3. The role of International telecommunication testing center (ITTC) – Test Lab

#### The major tasks of Regional Test Lab

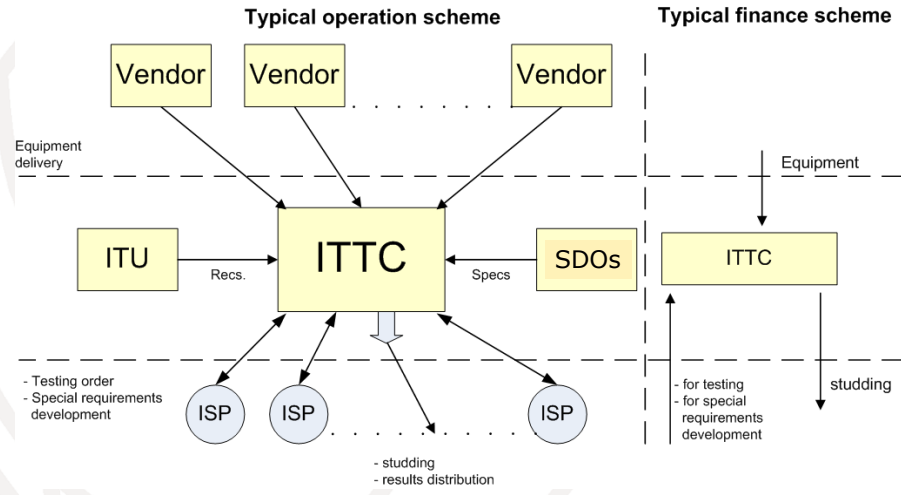

- ✓ **Conformance and Interoperability testing against International standards and Region's requirements**
- ✓ **Testing on: functionality, special Region's requirements and high performance**
- ✓ **Studding of testing and new technologies implementation**

---

ITU Forum on Conformance and Interoperability for the Arab and African regions  
Tunis, Tunisia, 5-7 November 2012

### 3. The role of International telecommunication testing center (ITTC) – Test Lab

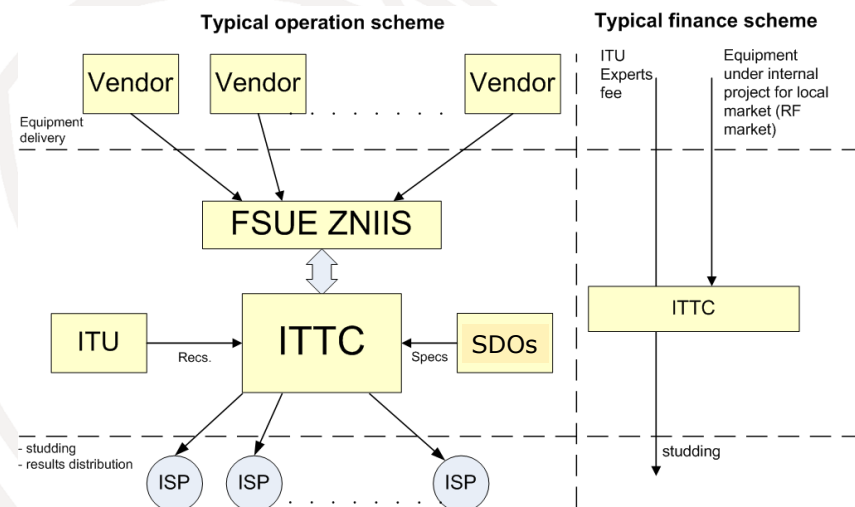

#### Operation and business model of Regional Test Lab (3-rd party Testing center)

ITU Forum on Conformance and Interoperability for the Arab and African regions  
Tunis, Tunisia, 5-7 November 2012

### 3. The role of International telecommunication testing center (ITTC) – Test Lab

#### Operation and business model of ITTC Regional center in Moscow

ITU Forum on Conformance and Interoperability for the Arab and African regions  
Tunis, Tunisia, 5-7 November 2012

### 3. The role of International telecommunication testing centers (ITTC) – Test Lab

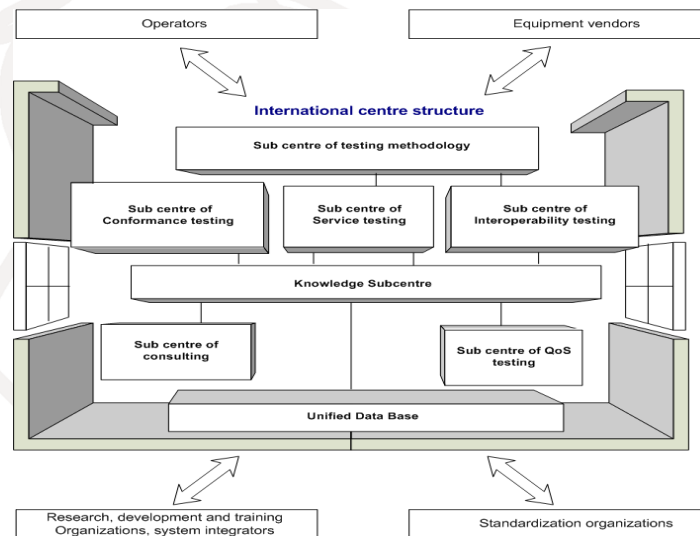

The common role of center results for Region as a whole

- ✓ **ITTC is used by parties before implementing technologies/equipment on the existing ISPs network (mandatory condition for all ISPs of Region)**
- ✓ **The significance of ITTC requirements/results to the Region ICT community on implementation equipment, network solutions and services on the existing ISP networks of Region**
- ✓ **Establishing and developing different possibility of training including virtual technologies (virtual lab)**

ITU Forum on Conformance and Interoperability for the Arab and African regions  
Tunis, Tunisia, 5-7 November 2012

### 4. ITTC tasks

The structure of ITTC (based on ZNIIS experience)

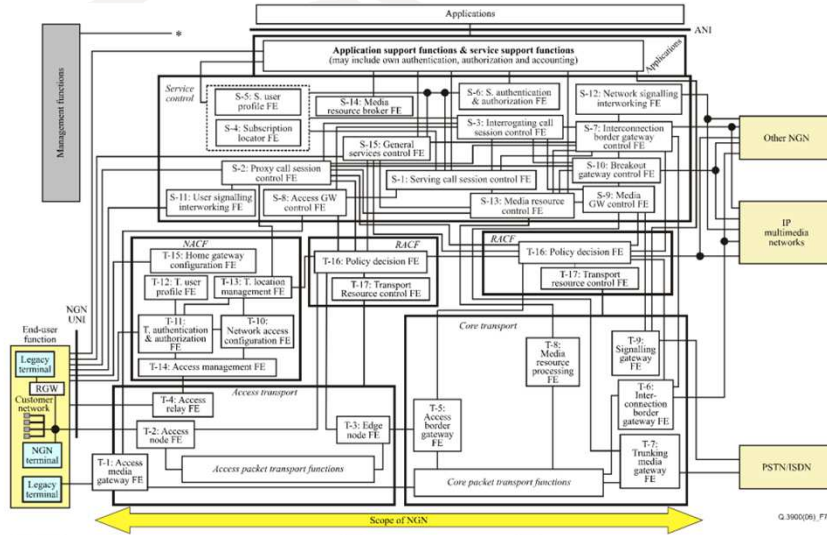

ITU Forum on Conformance and Interoperability for the Arab and African regions  
Tunis, Tunisia, 5-7 November 2012

#### 4. ITTC tasks

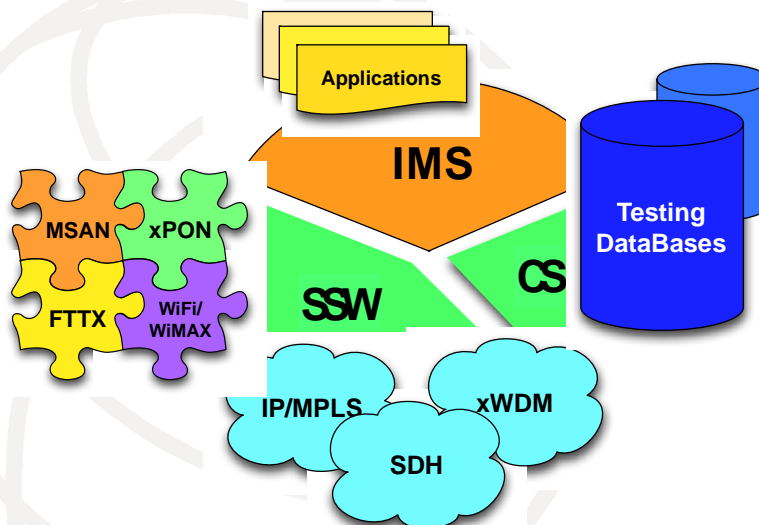

##### The basic structure of Model network (Y.2012/Q.3900)

ITU Forum on Conformance and Interoperability for the Arab and African regions  
Tunis, Tunisia, 5-7 November 2012

#### 4. ITTC tasks

##### Market driven architecture of Model network (ZNIIS experience)

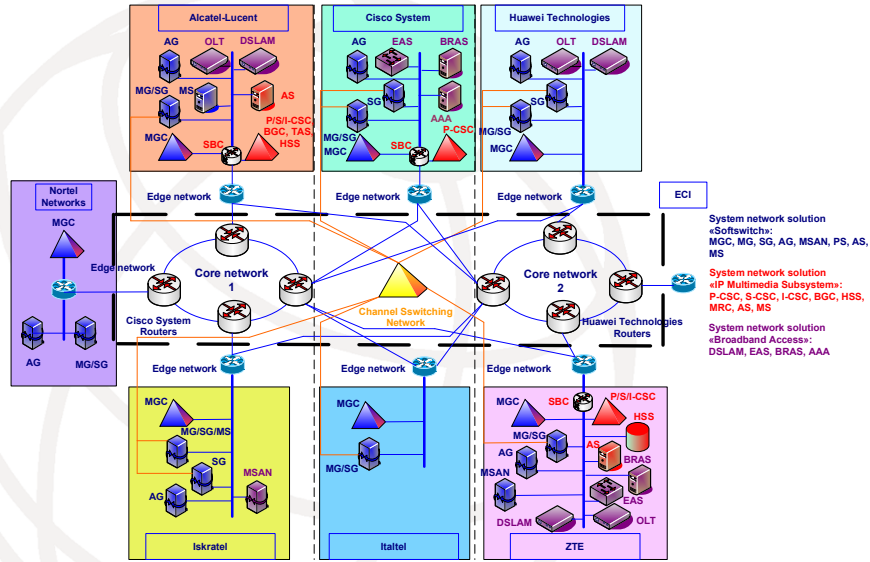

ITU Forum on Conformance and Interoperability for the Arab and African regions  
Tunis, Tunisia, 5-7 November 2012

## 4. ITTC tasks

### The instance of technical infrastructure of ITTC (ITTC of Moscow)

ITU Forum on Conformance and Interoperability for the Arab and African regions  
Tunis, Tunisia, 5-7 November 2012

## 4. ITTC tasks

### The common set of tests conducting on the Model networks

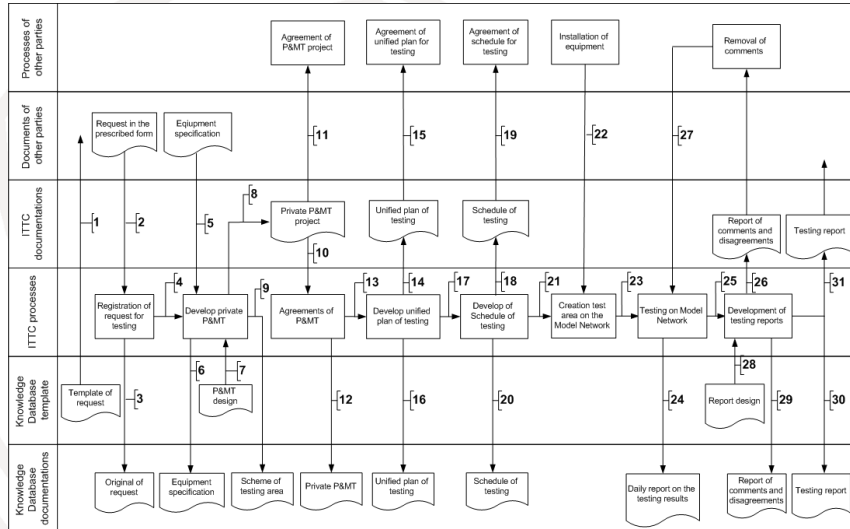

- ✓ **Testing on conformance and interoperability** against international specification (ITU and other SDOs)
- ✓ **Testing against ISP requirements** (safety, services, security and etc.)
- ✓ **Testing of performance** equipment and network solutions (benchmarking)
- ✓ **Testing of market driven services** (services observation)
- ✓ **Testing abnormal behavior** of equipment&network solutions (under pick load)
- ✓ **Testing of protocols and interfaces**
- ✓ **Testing management systems** and OSS/BSS process
- ✓ **QoS/QoE assessment and NP testing**
- ✓ **Metrology**

ITU Forum on Conformance and Interoperability for the Arab and African regions  
Tunis, Tunisia, 5-7 November 2012

## 4. ITTC tasks

### The typical operation scheme of testing procedure in ITTC

ITU Forum on Conformance and Interoperability for the Arab and African regions  
Tunis, Tunisia, 5-7 November 2012

## 4. ITTC tasks

### The unified testing DataBase of ITTC

- 📄 **Support of all documents on equipment and software which is testing on the Model network include storage of etalon software**
- 📄 **Registration results of testing and all additional documents (daily reports, history of detected errors correction and etc.)**
- 📄 **Support of equipment, services and technology testing Registry**
- 📄 **Storage and analyze results of testing (filter, content searcher and etc.)**
- 📄 **Electronic portal for preview testing procedure**
- 📄 **Remote access to the DataBase**

ITU Forum on Conformance and Interoperability for the Arab and African regions  
Tunis, Tunisia, 5-7 November 2012

## 4. ITTC tasks

### The ITTC's set of measurement equipment

- **The automatic test system based on TTCN-3 scripts and realized test specifications (ATS) for conformance testing**
- **The generator of invariant payload (public telephone network, public packet network and services)**
- **The network architecture emulation system (virtual equipment) for emulation packet switching traffic transit**
- **The QoS and monitoring/control test system include possibility different class of traffic generation**
- **The system of transfer incorrect messages and parameters**

ITU Forum on Conformance and Interoperability for the Arab and African regions  
Tunis, Tunisia, 5-7 November 2012

## 4. ITTC tasks

### ITTC training tasks

- **Confront training** (testing approaches, implementation of NGN equipment, principle of compare equipment, implementation QoS parameters on the network and etc.)
- **Virtual training**

ITU Forum on Conformance and Interoperability for the Arab and African regions  
Tunis, Tunisia, 5-7 November 2012

#### 4. ITTC tasks

##### The virtual training

## WTDC-10 RCC initiative was supported.

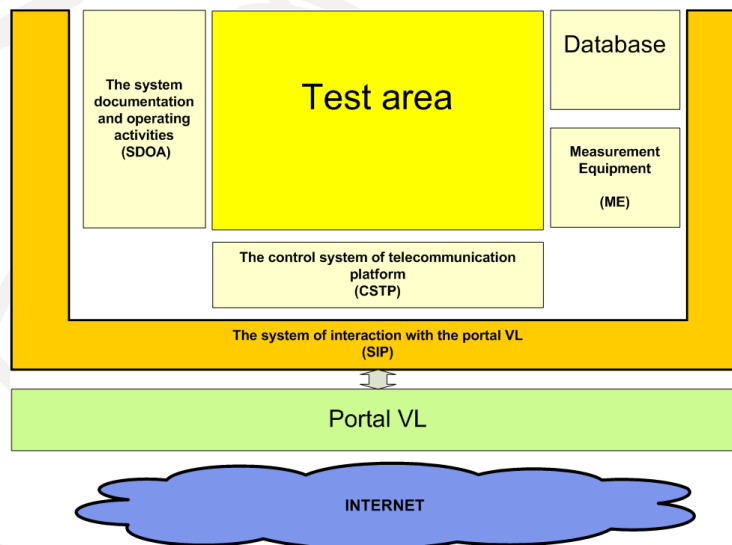

“Creation virtual laboratories for remote equipment, technologies and services testing under Resolution 76 WTDC-08, ITU database filling and providing remote experts of development countries training”

ITU Forum on Conformance and Interoperability for the Arab and African regions  
Tunis, Tunisia, 5-7 November 2012

#### 4. ITTC tasks

##### The organization scheme of Virtual lab

ITU Forum on Conformance and Interoperability for the Arab and African regions  
Tunis, Tunisia, 5-7 November 2012

## 4. ITTC tasks

### The instance of Virtual Lab Portal

The screenshot displays the Virtual Lab Portal interface with several components:

- Test Zone:** A network diagram showing Vendor1 (10.0.0.24) connected to Vendor2 (10.0.0.48) via a central ME (Ixia 400T) at 10.0.0.35. Intermediate IP addresses 10.0.0.25 and 10.0.0.47 are also shown.
- Control system equipment:** Two panels for Management system Vendor1 and Vendor2, each with a C:\inet 10.0.0.24 and 10.0.0.48 field.
- The control system measuring equipment:** A detailed view of the Ixia 400T configuration.
- Forum:** A discussion thread titled "Ivanov (Applicant): what has caused the appearance of error messages from 408 Vendor2". It lists participants: Konstantin (Expert ITTC), Strigalnikov (Expert ITTC), Victor (Expert ITTC), Ivanov (Expert ITTC), and Alexander (Applicant). Status: On-line.
- Project information:** Applicant: OAO "Telecom invest" (Ivanov A.A.), Responsible ITTC: Savvin K.A., Project Start Date: 22.06.2011, Project end date: 27.06.2011.
- Database of Virtual Laboratory:** A search bar with the text "Analysis of materials....." and a progress indicator.

ITU Forum on Conformance and Interoperability for the Arab and African regions  
Tunis, Tunisia, 5-7 November 2012

## 5. The typical work plan for building ITTC

- ❏ **Conception of creating ITTC** taking into account Region specific development (tasks, requirements for test zone, "live" functionality procedure and etc.)
- ❏ **Work project of ITTC building** development (testing scheme, set of telecom equipment, set of measurement equipment, requirements to the premises)
- ❏ **Normative-technical documentation development** (testing procedure, training procedure and etc.)
- ❏ **Testing scheme creation** (delivery telecom and measurement equipment, preparation cable infrastructure and etc.)
- ❏ **Testing program creation for Region** (specific test specification for Region's ISP)
- ❏ **Data base and unified Internet portal development**
- ❏ **Training courses development** and providing training event

ITU Forum on Conformance and Interoperability for the Arab and African regions  
Tunis, Tunisia, 5-7 November 2012

## 6. The ZNIIS experience in ITTC activities

- ❏ **The Model network is developed (Rec. ITU-T Q.3900). Testing Database was developed (Rec. ITU-T Q.3903)**
- ❏ **More than 100 vendors/network solutions were tested for request of national ISP**
- ❏ **More than 50 test specification for NGN and traditional networks (TDM) were developed**
- ❏ **The ITTC under joint project ITU-ZNIIS was built (5 training event were provided, 3 test events were done)**
- ❏ **The automatic scripts (ATS) for testing based on TTCN-3 is under construction**
- ❏ **The Virtual lab is a new project ITU-ZNIIS for development for next 4 years**

ITU Forum on Conformance and Interoperability for the Arab and African regions  
Tunis, Tunisia, 5-7 November 2012

## Conclusion

- ❏ **ITTC could be used as a major part of developing strategy of a Region and as a part of ITU C&I Programme which will help to world ICT community resolving the C&I issues**
- ❏ **WTO members have the opportunity to make the local regulations (in accordance with TBT agreement) based on ITU Recommendations that will be used for C&I testing under ITTC activities**
- ❏ **Test Lab like ITTC will raise quality and speed of implementation equipment and services on the Region's ISP networks**
- ❏ **ITTC could become the unique center for a Region within the framework testing and training**
- ❏ **ITTC can help in reducing of digital gap in developing countries**
