

***REGULATORY TRAINING***  
***(Mongolia, July 4<sup>th</sup>, 2003)***

**SUMMARY REPORT**

<b>Name of Session:</b>	<b>Roles of regulators and licensing as a market entry</b> (4 July 2003: p.m.)
<b>Name of Rapporteur:</b>	Rapporteur Mr. Battogtokh, CRC, Mongolia
<b>Name of Speaker:</b>	Dr. Eun-Ju Kim, Senior Advisor for the Asia Pacific, ITU
<b>Summary of Presentation:</b>	<ol style="list-style-type: none"><li>1. Trends of regulators: different scenarios;</li><li>2. Main objectives, functions, fundamental issues, challenges of regulators;</li><li>3. Balanced regulations and regulator!</li><li>4. Licensing and its major issues: categorization, mechanisms, application forms, procedures, number of licensees, etc.</li></ol>
<b>Highlights of Question &amp; Answer session:</b>	<p>Mr. Sharil: There is no way that a regulatory authority does not have any relationship with a ministry, but their assumptions of regulatory issues maybe different. I agree with a representative of MOI that a regulator and a policy-maker should be separated.</p> <p>Dr. Kim: In Korea they understood an importance of broadband services, but it took 20 years to develop appropriate regulations.</p> <p>Mr. Narmandakh, MOI: In Mongolia a regulator and a policy-maker can be separated and independent from each other. But if a policy is not adequate , a regulator has to give his recommendations to the prime Minister. A regulator has to correlate with the government through the representation in the CRC.</p> <p>Dr. Kim: This is a very good arrangement.</p> <p>Mr. Enkhmend, CRC: In some cases, CRC is making its decision apart from the policy. Are there any similar situations in Malaysia?</p> <p>Mr. Sharil: It is very difficult question. We consider our policy by dividing into 3 separate issues: technical, public and operational policies. And all decisions have to be done in very precise division of these objectives, though there are some cases of overlapping.</p> <p>Dr. Kim asked about difference of “A” and “B” classifications of licensing and clarification of licenses for ISPs and Mrs. Tamir gave explanations on these issues.</p> <p>Mrs. Tamir gave clarification on selection procedures of mobile operator, which are based on tendering.</p>
<b>Recommendations (if any):</b>
