Mr. SOUSTAIN Chigalu **MALAWI**
2ⁿᵈ Price

The proposal will address ICT ACCESS to Malawi people, African people, initially using the existing infrastructure, resources and knowledge. Priority services will be ICT training, telephone and Internet. I would first use post offices which are found in rural areas and have phone line, trained staff and office space. Where there is no electricity, solar power would be used. My initial funding would be US$ 100, my per diem from ITU and I will attract fellow youths to contribute their resources i.e. office space and their administrative skills and technical knowledge.
