

ITU-T Workshop

“Opportunities and Challenges in Home Networking”

Abstract

Geneva, 13 – 14 October 2005

Speaker: Carlo Cori
Telecom Italia

Session: **3: Home Networking Services and Business Models**

Title of Presentation: Telecom Italia experience on Home Networking for delivery triple play services

The increasing of broadband accesses and the development and maturity of some Home Networking technologies are bringing network operators to find out solutions for the delivery of triple play services. The paper describes the Telecom Italia experience gained in the last year in the Home Networking solutions, highlighting the main limits of these technologies, at the moment available, and the future technical solutions.
