

ITU-T Workshop

“Opportunities and Challenges in Home Networking”

CV

Geneva, 13 – 14 October 2005

Dominique Roche
France Telecom

Session: **1: Worldwide Status of Home Networking**
Title of **European perspective in Home Networking**
Presentation:

Dominique Roche, graduated from National Institute of Telecommunications, was born in Annecy, France.

After several years in building accommodations he has been in charge of Automatic Handling Equipments Centre first in French Postal Operator (French PTT) and after in SOFREPOST Company for Saudi postal complex centres.

One year in Riyadh and he came back to Bordeaux in France to manage both Project and Management Departments in an outside plant centre.

One year later he left France again to go to Jordan where he has been in charge of building and environment works of Jordanian Telecom Operator as senior consultant of SOFRECOM Company.

Then he has been manager of Regional Network Department and Data Processing Department in Bordeaux. He has performed numerous punctual missions abroad during this France Télécom period among which: Indonesia, South America and Africa. Since 2000 till now he manages network standardisation in France Télécom.

Father of the first French Guide on Communication Network Installation he chairs two Standardisation Committees within European Standardisation Organisations: CENELEC TC 215 (Installation of Communication Equipments & Networks) and ETSI/AT-I (Installation & Cabling).
