

# ITU-T IPv6 Workshop

## Abstract

Geneva, 22 – 23 June 2005

---

Speaker: Baher Esmat  
ICT Ministry of Egypt

Session: **IPv6 in other business sectors and commercial services**

Title of Presentation: IPv6 from Socio-economic Perspective

---

Broadband and mobile services in Egypt have been developing with a rapid pace, and are expected to continue spurring evolution in social, economic as well as cultural facets of life. This encourages the Egyptian government to look seriously at IPv6 as a potential enabling environment for our ICT industry to further develop and prosper. IPv6 is a critical technology not only to the evolution of the Internet with its innovative applications but also to the revolution of the mobile and broadband access with their ground-breaking services.
