

ITU-T IPv6 Workshop

CV

Geneva, 22-23 June 2005

Marc Blanchet

Hexago

Session: 2.1: NGN service platform Commercial services of carriers
Title of Presentation: Challenges and Opportunities in Developing Ipv6 Applications

Marc Blanchet is CTO at Hexago. Hexago sells an IPv6 deployment product which implements the TSP tunnel broker. Hexago is a spin-off of Viagenie, known for the 6tap exchange point, normos, freenet6, the Tunnel Setup Protocol and other IPv6 initiatives, all of which he was architect and implementor. In his previous job at Viagenie, he was a network security consultant for enterprises, governments and providers.

Marc co-founded the IPv6Forum, is member of the board and technical directorate. He is also member of the steering committee of the North American IPv6 task force. Marc was co-chair of the internationalized domain names (idn) IETF working group and co-chair of the IPv6 exchanges adhoc working group. He wrote several IETF drafts and RFC in both IPv6 and idn fields. He authored the "Migrating to IPv6" book to be published by Wiley, 2005 and co-authored the Cisco IPv6 course.

Marc receives a master's degree in electrical engineering from Laval University.
