

International Telecommunication Union

# IPv6 & Home Appliances

- New Trend of the Internet -

Makoto Saito  
NTT Communications

Workshop on IPv6  
Geneva, 22-23 June 2005

# Internet and the New Trend

Conventional (IPv4)

- Client-Server Model

Developed (IPv6)

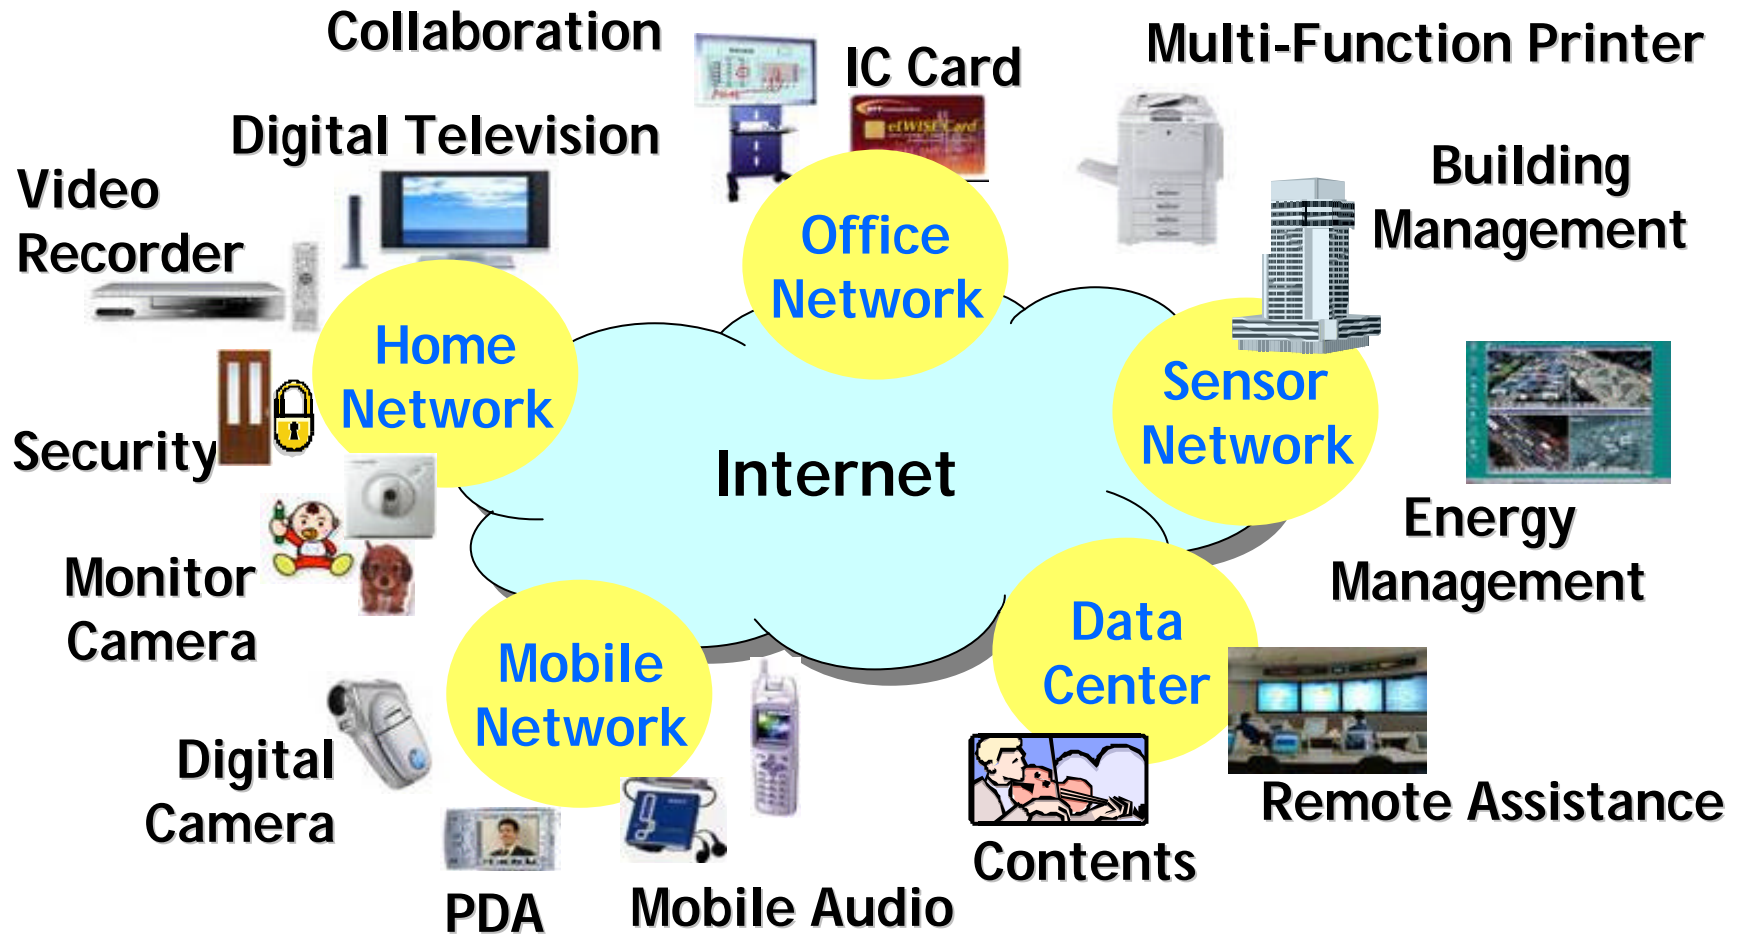

- Bi-directional Model (M2M\*)

\* M2M = Machine-to-Machine

# New Markets by M2M Communications

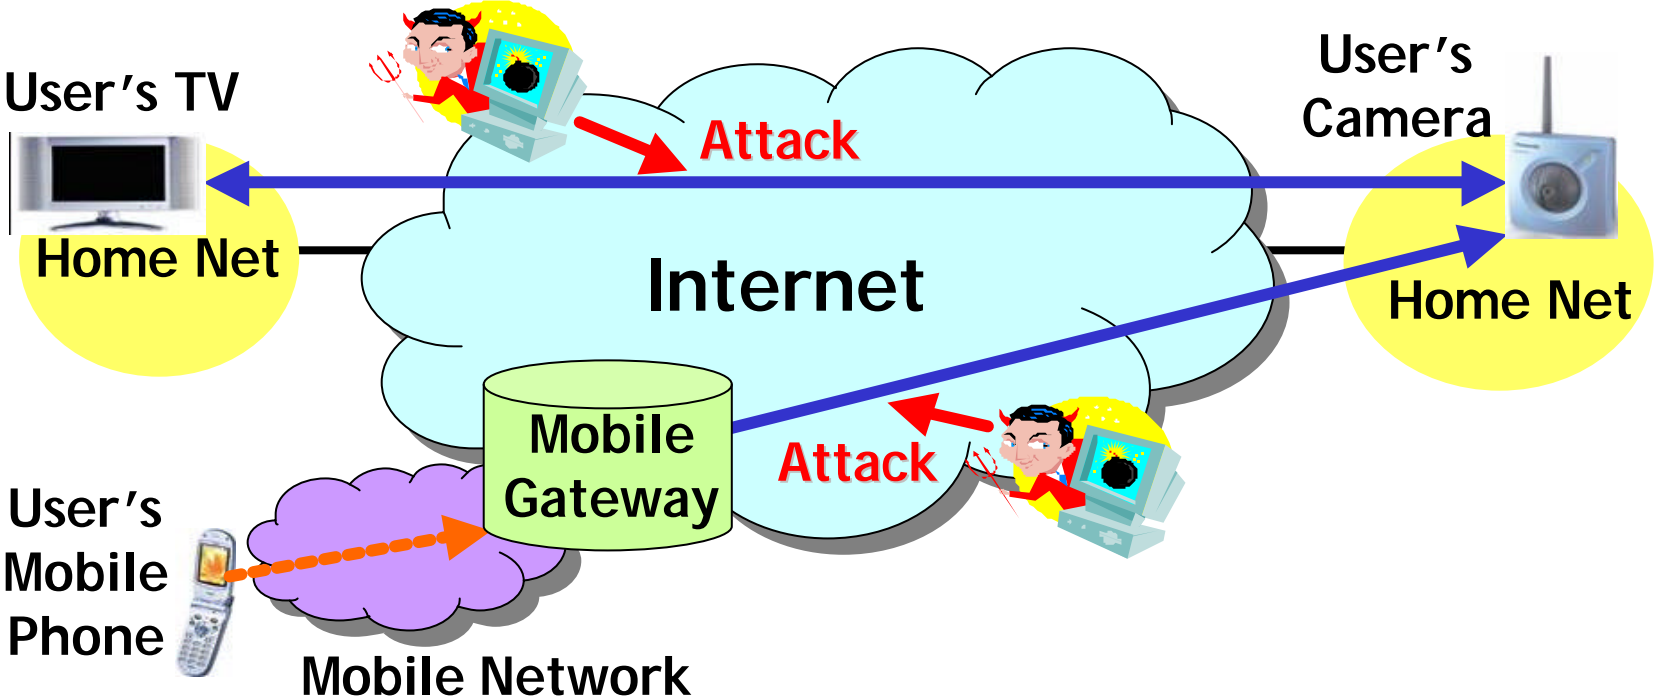

*More Machines, More Applications,  
More Customers, More Solution Markets*

Workshop on IPv6  
Geneva, 22-23 June 2005

# End-to-End Security

*How to secure access?*

# Telephone vs Internet What is missing?

## Telephone (Managed, User Friendly)

## Internet (Do It Yourself)

Signaling

Terminal ID

Trust Chain

Workshop on IPv6  
Geneva, 22-23 June 2005

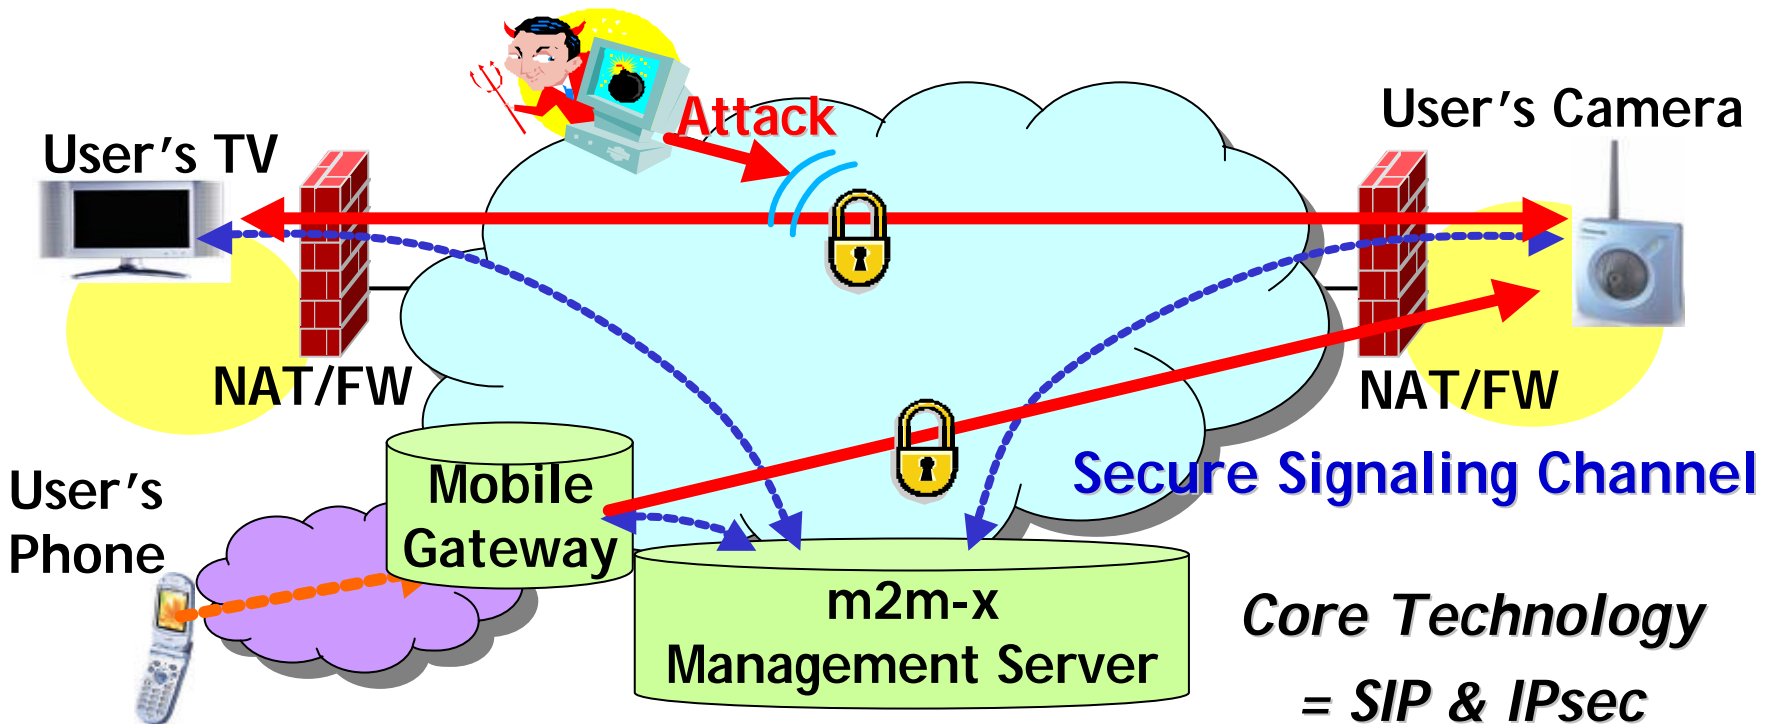

# NTT-Com's Approach: Secure Communication

## m2m-x

Machine-to-Machine Communication for any[thing | place | time]

**Secure**   **Easy**   **Inexpensive**

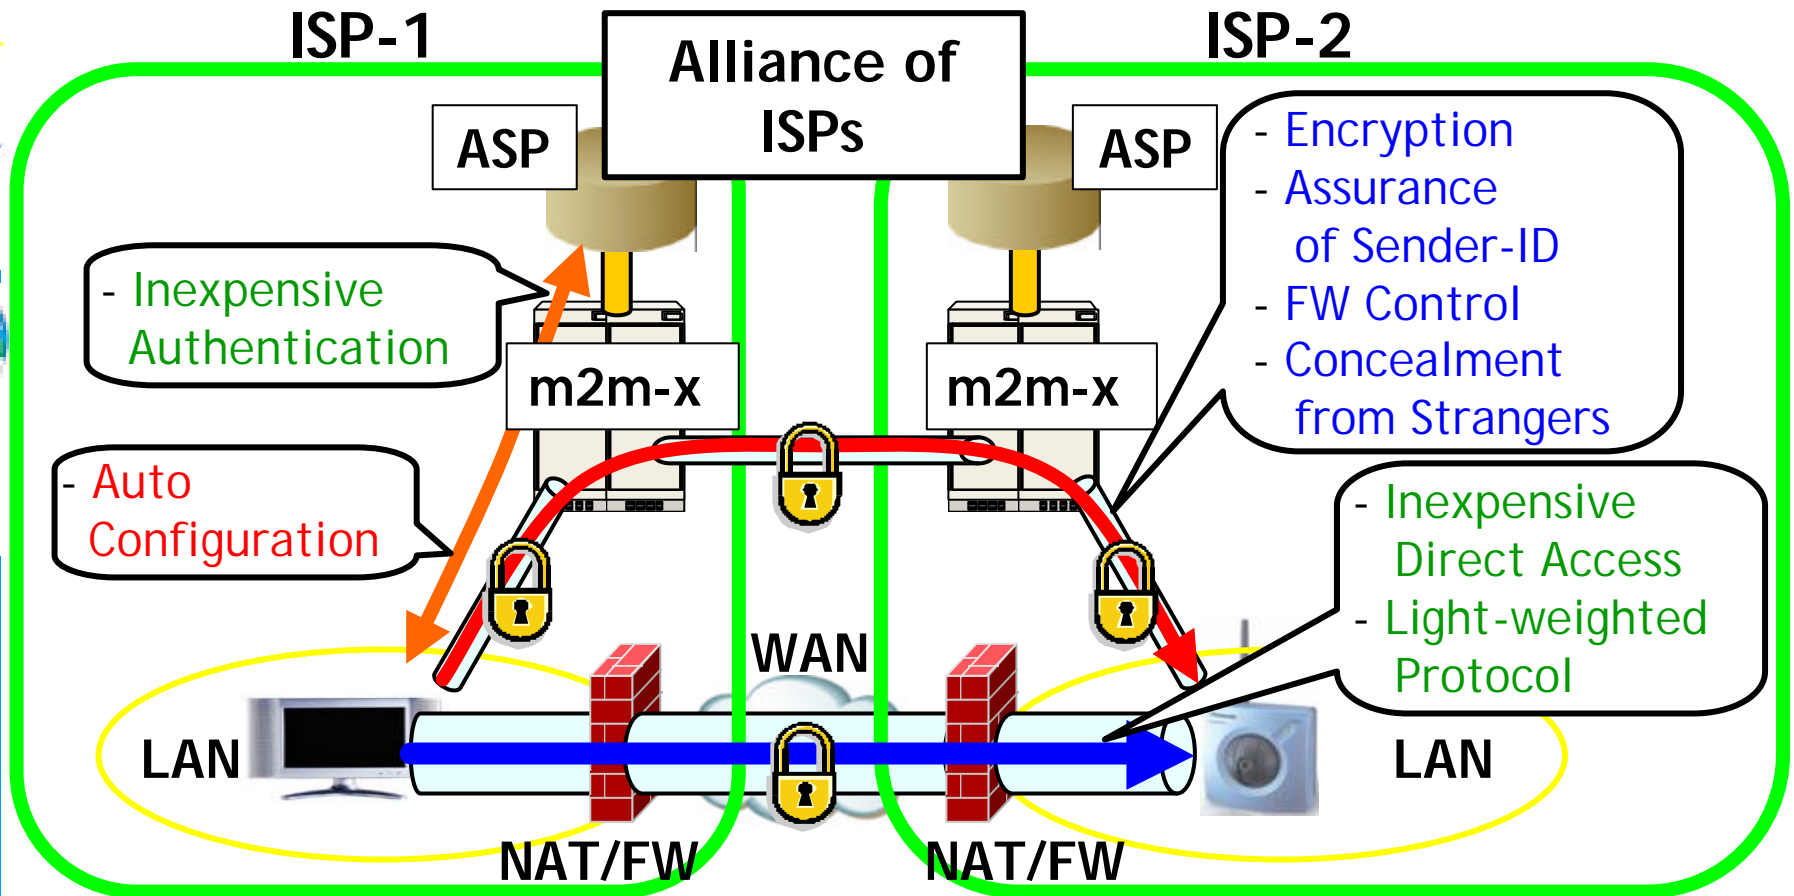

Workshop on IPv6  
Geneva, 22-23 June 2005

# Features of m2m-x

Secure

Easy

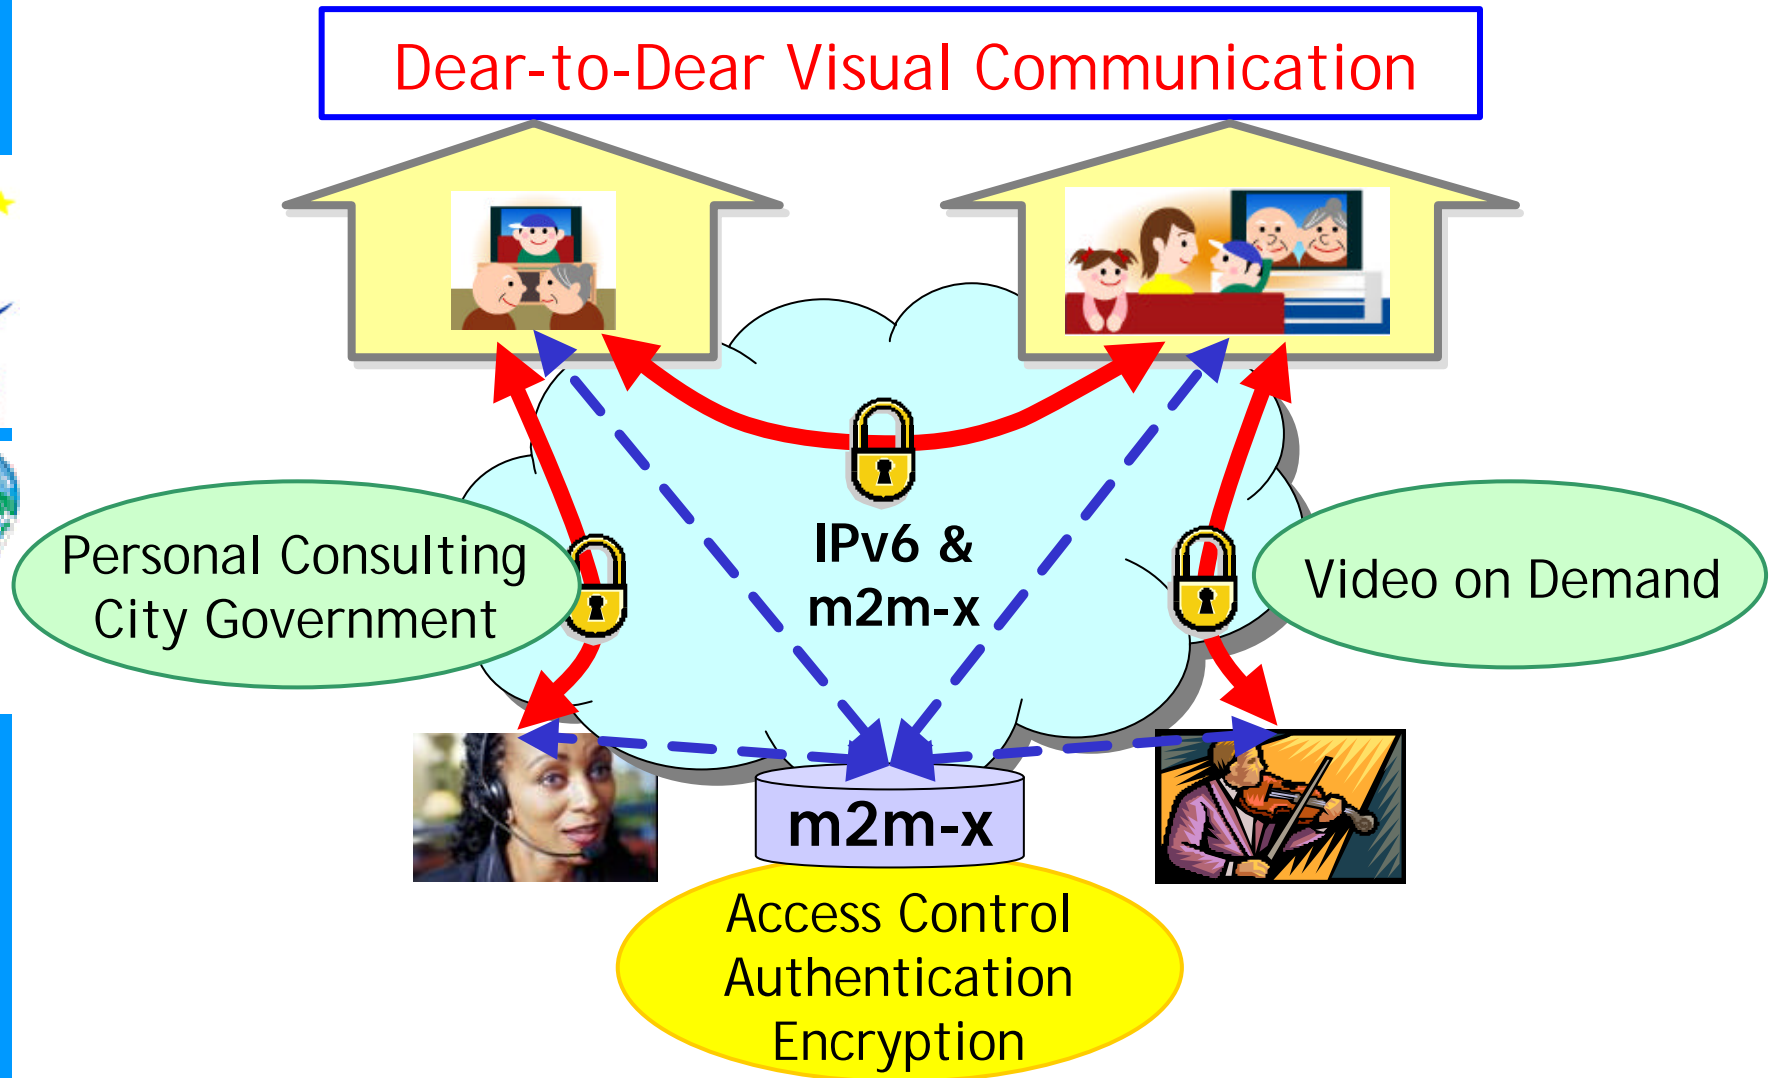

Inexpensive

# Applications Enhanced by m2m-x (1)

Workshop on IPv6  
Geneva, 22-23 June 2005

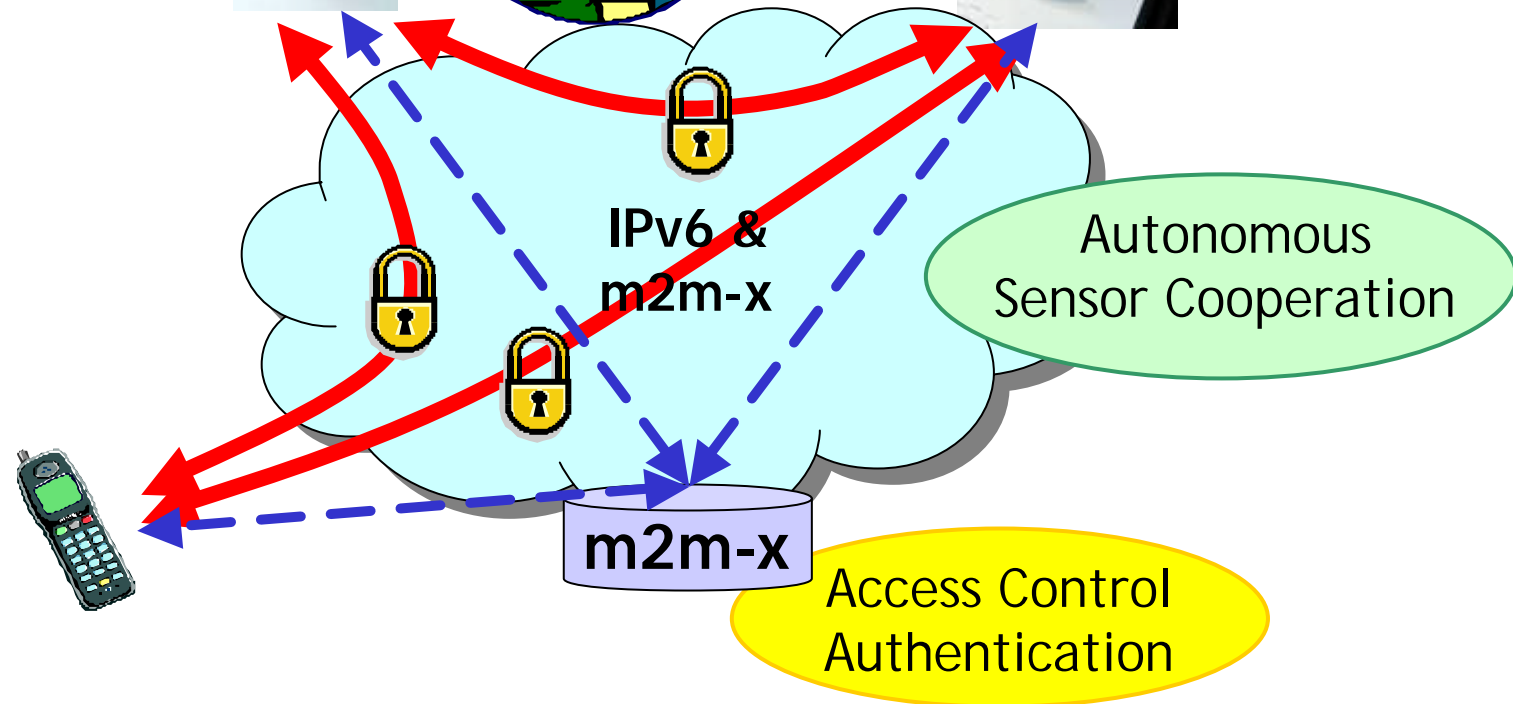

# Applications Enhanced by m2m-x (2)

## Sensor Network & Home Security

Sensor

Monitor Camera

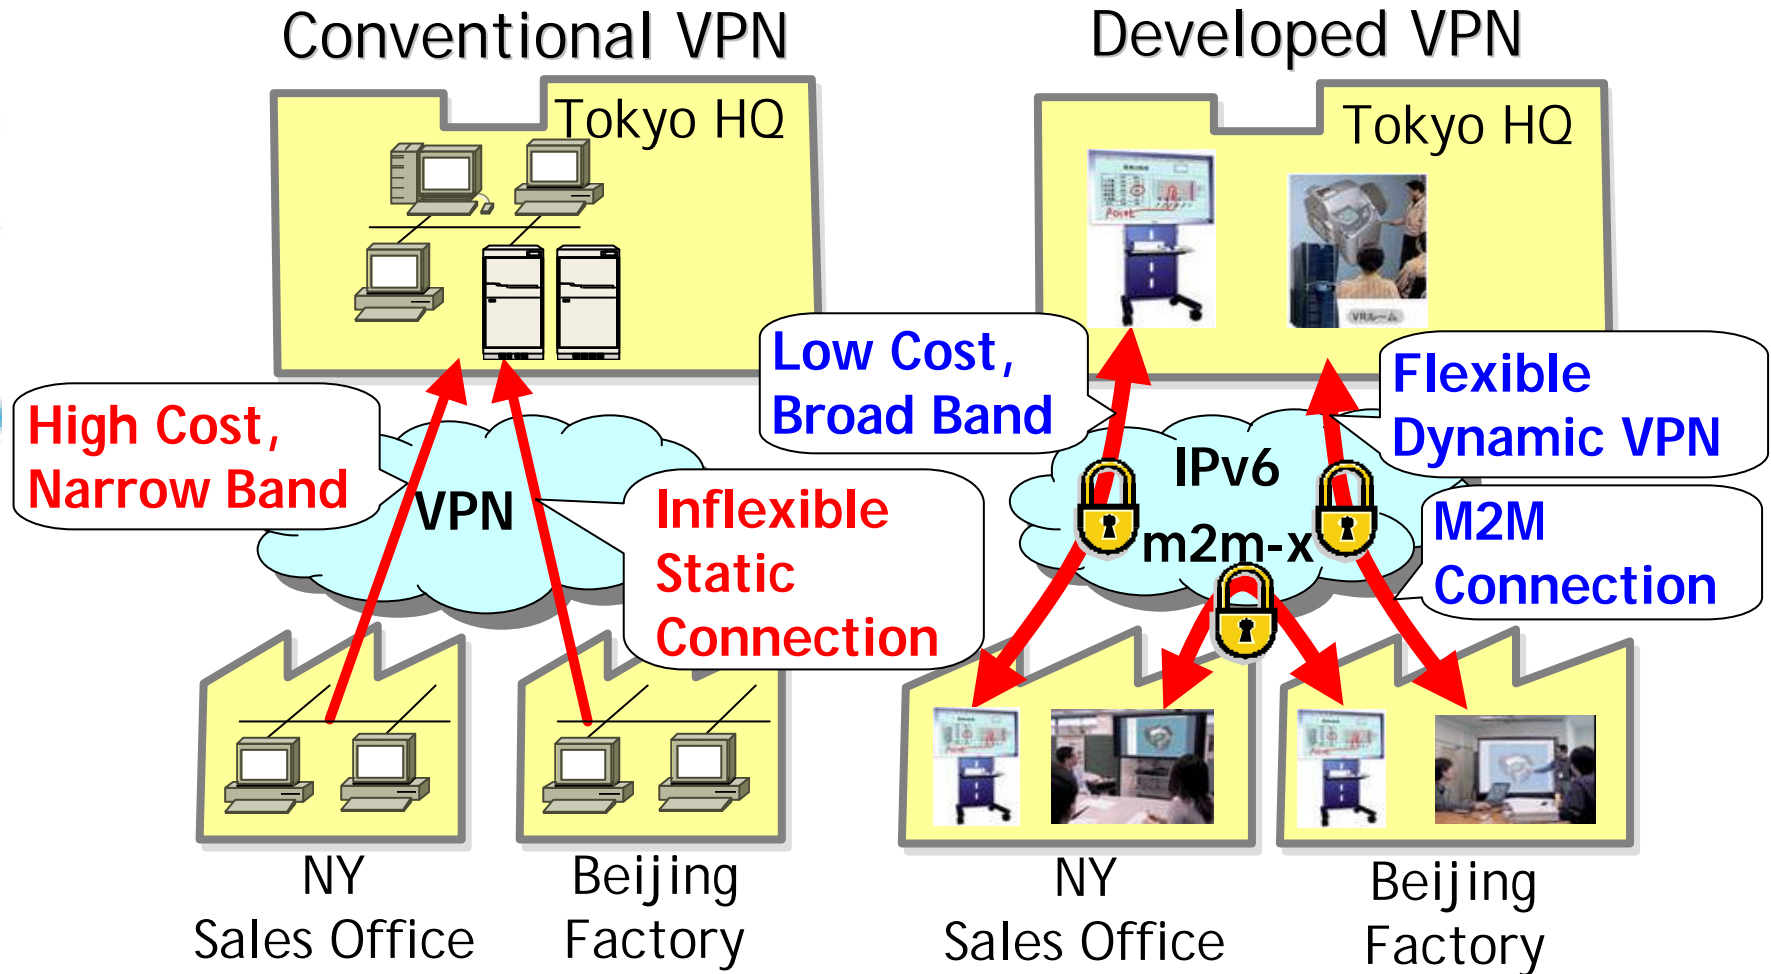

Workshop on IPv6  
Geneva, 22-23 June 2005

# Application for Business Users (m2m-vpn)

# m2m-x Home Appliance Trials (Tokyo, 2004)

Multi-Media Communication  
(Sanyo)

Personal VPN  
(NTT Com, Fujitsu, Toshiba, DIT)

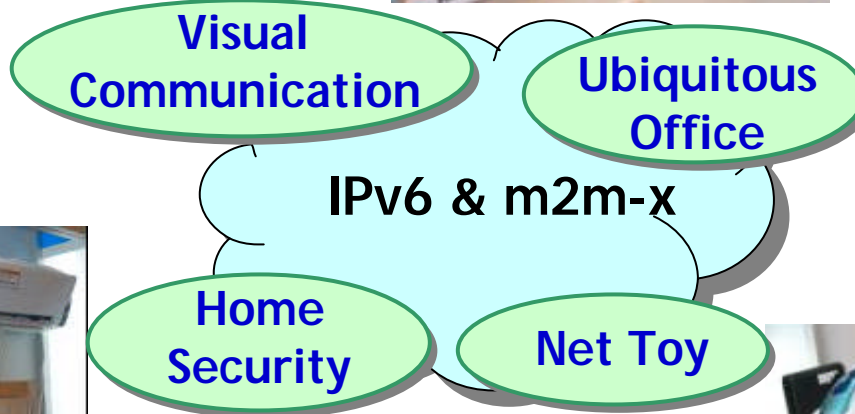

Ubiquitous Printing  
(Ricoh)

PS2 TV-Phone  
(Sony)

Cyber Conference  
(Pioneer)

EMIT Home System  
(Matsushita)

Bluetooth Home Security  
(Toshiba)

Hotline w/ TOY Control Port  
(Takara)

Workshop on IPv6  
Geneva, 22-23 June 2005

# Ubiquitous Open Platform Forum (UOPF)

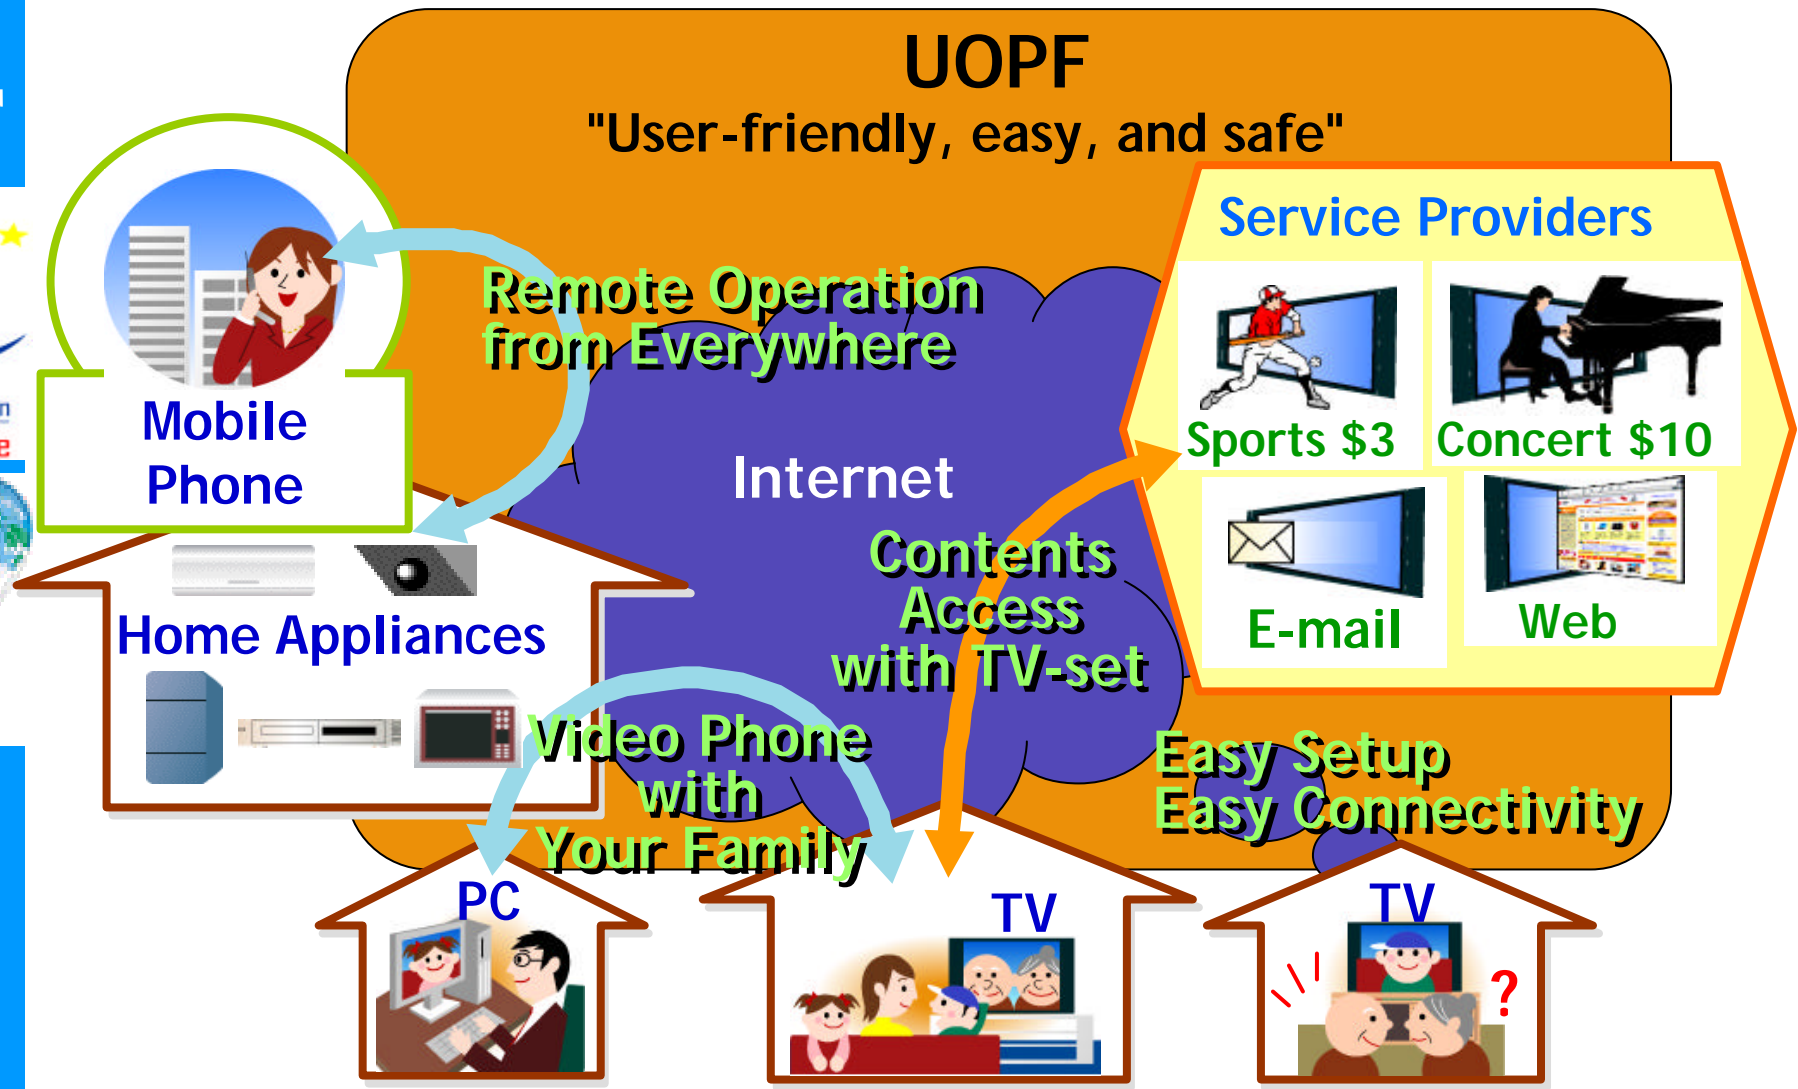

- Home Appliance Manufacturers and ISPs established “UOPF” to accelerate Internet Home Appliance market (Feb. 10<sup>th</sup>, 2004)
- NTT Com is leading this forum and acting in key roles
- m2m-x technology was approved as a UOPF standard specification for M2M communication

Workshop on IPv6  
Geneva, 22-23 June 2005

# Vision of UOPF

Workshop on IPv6  
Geneva, 22-23 June 2005
