

ITU-T Workshop

"New Horizons for Security Standardization"

CV

Geneva, 3 –4 October 2005

Abbie Barbir, Nortel

Speaker for Session: 3 : Emerging Technical Issues

Title of Presentation: Securing Platform and Trusted Computing Model

Chair for Session: 8 : Security Standards for the Developing Countries and Countries with Economies in Transition

Abbie Barbir has over sixteen years of experience in: Web Services, Data Architect, Security Architect, Computer architecture, Software Design, Digital Signal Processing, Data Compression, Data Encryption, Project Manager, Product Development and R&D. He is experienced in performing migrations, mappings, and specialized security solutions.

Abbie has published over 30 professional papers in the data compression, encryption, image processing, digital signal processing, LAN and parallel computing fields. He has over 15 US and International patents in networking, data compression and encryption. He is an active contributor in ITU-T, IETF, W3C, OASIS, Parlay and WS-I in Web Services and Security. He has been an invited speaker to many conferences and workshops in security and other areas.

Abbie Barbir received a Ph.D. in Computer Engineering from Louisiana State University in 1989 and joined Nortel in 1997.
