URL: <http://www.eml-uk.com>**Company Profile**

EML is a leader in telecoms asset recovery through line plant records purification systems for local loop telecoms operators. The leader in software for private cable network management systems for large university campus complexes, industrial parks, airport complexes, refiners and large industrial estates. The company also provides a remote cabinet door alarm monitoring and entry locking system that can be retrofitted to most all types of communications cabinets. EML also markets a new NTE (network terminating equipment) device that allows immediate demarcation of fault liability between customer and telecoms operators, saving unnecessary call-out visits, and loss of valuable time on fault location. In co-operation with ILC in Atlanta, EML provides monitoring management and control (MMC) software for satellite earth station, data (SNMP), cable and telephone networks. The company also markets specialised fault-location test equipment, no break cable change-over equipment as well as providing planning and management for MDF Frame compression and street cabinet up-lift and renovation.
