**Company Profile**

Telindus is a manufacturer of network access and video surveillance products. The international Telindus group is a European expert in data and telecommunications networks and a well-known network integrator. The Telindus access products include equipment in the area of broadband DSL, Voice-band, Fibre-optic, integrated IP routing, ISDN switching and access multiplexing technology. On the booth a special focus will be put on the brand-new multi-service business concentrator for the delivery of value added services over unshielded copper pairs. The Telindus surveillance products specialise in high-quality video networking equipment for use on high-speed digital networks. Featuring low-latency, real-time, TV like picture quality, Telindus surveillance products have been designed specifically for security, transportation monitoring and industrial monitoring and automation applications. The Telindus Group currently employs over 2,000 people across sixty establishments spanning seventeen countries in addition to an extensive network of global agents across all continents. For more information on Telindus' solutions and services, please visit www.telindus.com
