Lockheed Martin is a leading manufacturer of space systems for telecommunications, science and environmental applications. At the forefront of the telecommunications revolution, we offer high-reliability space-based systems that support a wide range of commercial services including fixed satellite, direct broadcast, mobile, multimedia, Internet, and broadband. Our award-winning A2100 satellites, inaugurated in 1996, were designed for reliability and ease of operation, with industry-leading control capabilities, low mass and parts count, and efficient propulsion systems for long life on orbit. We have launched over 860 spacecraft, including 172 telecommunications satellites, with 124 still on orbit at the end of 2003.
