**Company Profile**

CBOSS – innovation-driven developer of comprehensive solutions for ever-converging telecommunications demands. CBOSS provides full automation for telecommunication key routines including billing & customer care, computer telephony, analytical systems, corporate management, network management & administration, Internet systems, data warehouses & data mining. Since 1996, CBOSS Corporation grew up along with the emerging telecom markets of Russia and the CIS to retain a trademark of a leading software provider. CBOSS' positioning as system integrator is enabled with internationally renowned firms, namely Sun Microsystems, Oracle, Intel, Hewlett Packard, Compaq, Lucent Technologies, Microsoft, Xerox, Avaya Communications, etc. Our solutions installed in 80+ operators in 7 countries service 15M subscribers, including Russia's leading GSM provider, MTS. Strategy: CBOSS' strategy is to generate integrated cost-effective turn-key solutions comprising software and hardware, along with system tuning and configuring, user training, on-site installation and implementation, integrated warranty/post-warranty support and consulting. Core product – Convergent Business Operation Support System (CBOSS), which includes: billing (mobile, PSTN, Internet, Interconnect, etc); customer care; POS; customer registration and contract management; SIM card management; mediation devices; inventory control; settlement with service providers and dealers; management information system.
