Graniou specializes in the telecommunications infrastructure and offers telecoms solutions to fixed and mobile network operators, to telecoms manufacturers and to local authorities. With its optimized layout of 40 establishments in Europe (31 of which are in France) and a staff of 1,100 dedicated to the design, deployment and maintenance of fixed and mobile networks, the Graniou network delivers local services at international standards. Decentralized teams are available to clients close to intervention sites to work on finding solutions in the design and proportioning of their telecommunications networks. In this way, a true partnership relationship is set up to ensure the best possible conditions for network optimization, monitoring and adaptation to developments linked to traffic and technology. In the same spirit, Graniou provides operational assistance services and is involved in maintaining networks and equipment in operational condition. Through the implementation of its expertise, Graniou contributes to the optimization of network running costs and investments, so demonstrating its desire to support its clients over the long haul. The leader in France and a major European player, Graniou is particularly associated, along with its partners, with the expansion of innovative technologies such as mobile multimedia, wireless internet or digital terrestrial television (DTT). In 2002 Graniou carried out more than 800 infrastructure projects (radio and terrestrial relays, fiber optic) and network projects (WDH/SDH, TM/IP, 2G/3G, WLL, Wi-Fi), representing a turnover of 130 million euros. Graniou is a trademark of VINCI Energies (turnover of 3 billion euros, 27,000 professionals in 20 countries).
