**Company Profile**

Telmap is a leading software provider of real-time mobile mapping applications specializing in off-board navigation, location management and telematics solutions for cellular carriers, car manufacturers and telematics service providers. Telmap's product range includes:

Polaris Off-Board Navigation systems for Java-enabled devices: provides pinpoint accurate maps, turn-by-turn directions and voice, text and graphic instructions.

Vega Location Management: a map-based operating centre that enables managers to create reports and view vehicles and mobile workforce movements via the Internet or intranet.

Vega for Telematics: an end-to-end solution for telematics services including stolen vehicle tracking, roadside and emergency assistance.
