Visit Telspec to boost the earnings power of your telecom network – by adding more services, more bandwidth and more customers, with the emphasis on fast time-to-service and fast payback. Telspec access systems boost the subscriber capacity and/or bandwidth of copper access networks, offering fibre-quality performance and flexible bandwidth allocation up to 67Mbps. Ask about Telspec's new fast-track 'Rural broadband copper' and 'fibre-to-the-kerb' solutions. The latest Telspec DISP platform runs a vast range of value-added services including IN, IVR and mass-calling. Use of single system architecture for all services ensures maximum flexibility and expandability, with the cost benefits of standardisation.
