Company Profile

4RF Communications Ltd. engineers high performance long haul point-to-point digital microwave radio links. The Aprisa product range offers smart standalone solutions with capacities ranging from narrow band Nx64 kbps through to multiple E1. Applications include extension of PSTN voice and Internet services into urban and rural communities, linking of cellular and mobile radio base stations, and utility networks. Aprisa has an integrated multiplexing architecture supporting the direct connection of legacy voice, data and IP interfaces. These ETSI certified radios operate with spectrally efficient QAM modulation and robust FEC schemes in the licensed UHF and low microwave frequency bands.
