Company Profile

Crystal Group Inc. is a leading manufacturer of carrier–class Computer architecture, remote management systems, rack systems and related integration services for mission–critical installations worldwide. Incorporated in 1991, Crystal has been providing space–efficient high–availability computer solutions to the telecommunications market for over a decade. Unified communications, Internet telephony, automated speech recognition, broadcasting and streaming media are just a few of the applications in which Crystal computers are used. Crystal combines quality products and specialized services to provide customers with solid solutions and long–term vendor/partner relationships.
