**Company Profile**

ANAM software and services give operators, content providers and service providers a rich set of tools to leverage existing investments and fully benefit from application to person messaging. ANAM solutions can be provided as fully managed hosted services or deployed in-house, allowing great flexibility in both functionality and cost of ownership. ANAM provide gateways (SMS, MMS, WAP), aggregation of multiple third party connections to SMSCs and MMSCs with the necessary protection, management and security and a service delivery platform which allow content providers, service providers and corporates to rapidly create and launch new messaging applications.
