Company Profile

Tango Telecom provides a value-added services platform with a range of services for wireless and wireline operators. The Converged Charging Node suite enables mobile operators to charge both prepaid and postpaid customers easily and flexibly for data services (SMS, MMS, GPRS, WLAN and content), with no disruption or upgrade required for legacy prepaid systems. In all cases the CCN eliminates fraud while fully supporting prepaid roaming. The system is highly modular and scalable and fully NEBS compliant. The CCN supports interfaces to IN-based prepaid systems from the major vendors, including CAP3, as well as OSA/Parlay and proprietary interfaces.
