RSCC is a Russian national space communications operator. RSCC owns an orbital constellation comprising 10 geostationary satellites, which operate in C-, Ku- and L- bands. RSCC satellites are positioned on the orbital arc extended from 14° W to 145° E. The satellites' footprints cover the territory of Russia, CIS, Europe, Asia, North and South Americas, and Africa. RSCC provides its customers with high-quality telecommunication services on the basis of satellite and terrestrial facilities of its own multi-service network. RSCC ensures transmission of federal and local TV/Radio programmes, provides mobile presidential communication, telephony, data transmission, and Internet access and videoconferencing.
