Company Profile

Appium Technologies is a leading vendor of next generation telecom application platforms based on open telecom and Internet standards. Appium is one of the first companies in the world to provide OSA/Parlay-based network-transcending services and platforms for deploying advanced services on all types of networks including VoIP and 3G. The Appium product suite is complete in providing OSA/Parlay application development, validation, testing, deployment and provisioning components. It is the only platform on the market offering all of the tools required by network operators in the service life cycle.
