Company Profile

Abest Communication Corp, a leading supplier in broadband multi–service access platform, has brought to market a long reach V5 integrateable access platform iV called the AXSPlus – capable of transporting both broadband and narrowband services (Last Mile of copper cable) to the remote subscriber. By using G.SHDSL technology for the DSL pair, the AXSPlus offers the provider greater cable fill ratios without compromising adjacent circuit integrity. With AxPlus, carriers can provide multiple services from narrow to broadband to their remote users cost effectively in a single access platform. Abest Communication Corp is truly the "First Name in Last Mile" access.
