**Company Profile**

Wysdom empowers mobile operators to deliver high-value data services to their consumer and enterprise customers with their flagship software, Wysdom MAP-OS. As the industry's first highly-packaged mobile network operating system, Wysdom MAP-OS includes a Service Delivery Platform (SDP) as well as innovative application management, security and network access capabilities. MAP-OS enables mobile network operators to develop, implement and manage truly innovative services and applications through a scalable, streamlined lifecycle management product offering. Wysdom is a key participant in the Open Mobile Alliance (OMA) as well as a member of technical and industry associations such as Parlay, GSMA, CTIA and CWTA. With a corporate history reaching back to 1995, privately-held Wysdom serves its global customer base from locations around the world.
