Company Profile

Telespazio, a Finmeccanica Company, is the leading innovator in space systems and satellite services for business and institutions worldwide. Telespazio is the only private operator offering a complete range of solutions: fixed and mobile telecommunications, television services, two-way broadband multimedia, satellite in orbit control, ground segment design, Earth observation data and applications, navigation and RW. With its own network of five space centres connected with fiber, more than 170 operating antennas and 30 satellite mobile units, Telespazio is the main communication integrator open to Europe and to the world.
