Company Profile

Geoimage, European leading digital mapping company since 1989, has developed a major skill in earth observation image processing applied to geographical database and mapping software.

GEOpolis offers a complete solution for wireless network planning based on satellite image processing. More than 1,000 cities are available. Each "city package" with 10m to 20m resolution, includes a four coverage Digital Terrain Model, Satellite Orthoimage, land-use map and transportation networks.

Geoimage also provides:

*GEOlandis, low-resolution
database (50m to 200m), for regional coverage,
*GEOmetris, very high-resolution
building databases (2m to 5m) for microcellular network and local loop applications.

Classifications

Industry Sector : Broadcasting, Mobile, Networking
