Company Profile

Anglia Flex &Power is a dedicated manufacturing partner that specialises in producing high quality battery management and flexible circuit solutions. Our state of the art factory is situated in Cambridgeshire where our extensive facilities offer world class capabilities. Many additional services include design, design for manufacture and value analysis. We also maintain a library of standard designs that can be modified to suit your requirements. Covering all cell technologies, assemblies can be produced on single and double-sided flexible, flexi-rigid or rigid PCB's, whilst robotic automation enables us to deliver cost effective, quality results with maximum flexibility.
