Company Profile

Apliware S.A. builds networking hardware and security products powered by embedded GNU/Linux with an auto-administration system and easy configuration tools. Apliware offers, with their partner Lightning, customized development and retail distribution services. Apliware provides firmware development kits for custom projects and partners. Our Strict Quality Assurance assures the distribution of mass-market and OEM firewall/VPN/ADSL products as well as meeting rigid Aerospace standards. Apliware has a solid history developing products for telecommunications (low cost firewalls, central telephone routers), banking (encryption, VPN) and the aerospace industry (high quality router for critical system navigation). <http://www.apliware.ch>

Lightning is a manufacturer of secure remote access gateways for Internet and Intranet with VPN (virtual private network) DSL, and wireless functionality. Lightning products are being used today by telecommunication companies, Internet service providers, government, and banking and educational institutions around the world. The company, founded 1965, is headquartered in Lausanne, Switzerland. Its products are available internationally in over 30 countries. <http://www.lightning.ch>
Phone: +41 (21) 654 2000

Together we offer well-rounded service and collaboration for our clients: from first conception, development and testing to user documentation, production and technical support.
