**Company Profile**

Loop makes your life simpler. Loop is an integrated, universal solution for the management of contacts, addresses and SMS on laptops, PCs, PDAs and mobile phones. Loop comprises the Loop PC software, Loop business card scanner and an infrared device to connect desktop PCs with mobiles/PDAs. Loop scans business cards into existing PIMs, groups and qualifies contact addresses, transfers information between laptops/PCs and mobiles/PDAs and prints in standard agenda formats. Loop is compatible with common mobiles/PDAs, PIMs and PC operating systems. Loop stands for easy use, one-time learning and enhanced security and privacy of personal data.
