Company Profile

Nascent Form's 3D Living User Interface technology enables you to deliver the next generation of mobile user experience. Benefits to operators and handset manufacturers include: decreased churn – deliver a consistent and compelling brand experience across all handsets, helping establish consumer loyalty; strong differentiation – deploy engaging and game-like UIs that are far more desirable to the mass market; increased ARPU – actively draw consumers in to accessing existing premium content and services; new revenue stream – offer consumers compelling new UI skins as chargeable downloads.
