

OPINION ITU-R 74-1\*

**SYSTEMS FOR SIGNAL INTERFACE CONNECTION BETWEEN SOUND-BROADCASTING  
RECEIVERS AND ASSOCIATED EQUIPMENT**

(1982-1990)

The CCIR,

CONSIDERING

- (a) the importance of facilitating the enhancement and greater efficiency of broadcast systems;
- (b) that the introduction of such improvements has heretofore often been delayed by the need to wait until equipment in the hands of the public has become obsolete;
- (c) that such delays could be shortened if appropriate means were provided for the connection of associated equipment;
- (d) the CCIR studies decided in Study Programmes 46G/10 and 46H/10,

IS UNANIMOUSLY OF THE OPINION

that the IEC should be invited to study and set standards for signal interface connection between sound broadcasting receivers, audio recorders and players, decoders for sound broadcasting supplementary services, and other associated equipment intended for use by the public, taking into appropriate account the studies that will be carried out by the CCIR on this subject.
