

OPINION ITU-R 75-1

**SYSTEMS FOR SIGNAL INTERFACE CONNECTION BETWEEN
TELEVISION RECEIVERS AND ASSOCIATED EQUIPMENT**

(1982-1990)

The CCIR,

CONSIDERING

- (a) the importance of facilitating the enhancement and greater efficiency of broadcast systems;
- (b) that the introduction of such improvements has heretofore often been delayed by the need to wait until equipment in the hands of the public has become obsolete;
- (c) that such delays could be shortened if appropriate means were provided for the connection of associated equipment;
- (d) the CCIR studies decided in Study Programme 18U/11,

IS UNANIMOUSLY OF THE OPINION

that the IEC should be invited to study and set standards for signal interface connection between receiving equipment, recorders, teletext decoders and other associated equipment intended for use by the public for conventional television, enhanced television and high-definition television, taking into appropriate account the studies that will be covered by the CCIR on this subject.

Note - The Director, CCIR, is requested to bring this Opinion to the attention of the CCITT and IEC. This Opinion has also been brought to the attention of Study Group 10.
