

RESOLUTION ITU-R 25-2

**Computer programs and associated reference numerical data
for radiowave propagation studies**

(1978-1982-1986-1990-1993-1995-2000)

The ITU Radiocommunication Assembly,

considering

- a) that methods of prediction of the state of the propagation environment and of radiowave propagation characteristics are given or referred to in ITU-R Recommendations;
- b) that for effective use of such methods, computer programs and associated reference numerical data are needed;
- c) that it is uneconomic for individual organizations to develop their own computer programs for these predictions;
- d) that databanks and computer programs associated with Recommendations of the ITU-R P Series (Radiowave propagation) are available from that part of the ITU-R Web site concerning Radiocommunication Study Group 3,

resolves

1 that the Director of the Radiocommunication Bureau should be requested to invite organizations which at present have their own computer programs, numerical reference data, and related documentation for the prediction methods described in the ITU-R Recommendations prepared by Radiocommunication Study Group 3, to make these available to the Radiocommunication Bureau through Radiocommunication Study Group 3.
