The BR IFIC (Terrestrial Services) represents a reference publication that contains the following relevant information for frequency management purposes:

- the complete and permanently updated **International Frequency List** (IFL) (including all the frequencies prescribed for common use), in Access® database format;
- the complete and permanently updated versions of terrestrial **frequency assignments/allotment plans**, in Access® database format;
- particulars of notices under treatment, in accordance with Article 11 of the Radio Regulations, for the updating of the Master Register;

The BR IFIC contains the latest version of the query software **TerRaQ**, the program **TerRaNotices** for creation and validation of electronic notices, the program **TerRaNV** used to validate electronic notice files generated by administrations, and the latest version of the **Preface** in Arabic, Chinese, English, French, Russian and Spanish, in PDF format.

The software package **TerRaQ** associated with the query, display, printing and exporting of data allows administrations to consult and extract to file particulars of recorded assignments and also the notices included in the latest publication (Parts I, II, IIB and III) and the associated Special Sections (Parts A, B and C).

The BR IFIC (Space Services) CD-ROM is published at the same time. Please see Publication Notice No. 283-10.

Software and hardware requirements

The BR IFIC (Terrestrial Services) is designed to be used on a personal computer running on Windows NT®, Version 4.0 or higher, on Windows® 2000, or Windows® XP, or higher, and requires Microsoft® Access® (Version 2000 or higher). Generally speaking, such a workstation configured with Microsoft's minimum requirements is sufficient for use with this publication.

In addition, approximately 4 gigabytes of disk space is required if the complete data are to be copied to the hard disk. If the data are to be kept on the DVD-ROM, only 1 gigabyte (approximately) of disk space is required.

It is to be noted that the disk space estimate is based on the current size of the Bureau's databases. The required disk space will, of course, change as a function of the size of the database, which depends on the number of notices received by the Bureau. Additional disk space will be required to store extracted subsets of the data.
