

**Alan R. Jamieson**

**Dr Jamieson is an independent consultant, director and co-founder of Added Value Applications Ltd, an Auckland, New Zealand, based company specializing in applications of telecommunications, radiocommunications and information technology, radio spectrum management studies, radio-communications system standards and project management. Clients include user organisations, corporates, international and national service providers and manufacturers, state owned enterprises and New Zealand government administrative agencies.**

**Alan's wide experience of attendance and participation at international and industry conferences includes:**

- 1. ITU-R study groups and working parties including Working Party 8A in which he is the current chairman of Working Group 3 on public protection and disaster relief communications.**
- 2. Attendance at a number of administrative conferences and conference preparatory meetings for more years than he cares to admit.**
- 3. Alan chaired working groups on spectrum allocation issues including MSS allocations at WRC-97 and IMT-2000 at WRC-2000.**
- 4. Alan will be the chapter rapporteur for mobile, mobile satellite and radionavigation service issues at CPM-02.**
- 5. He is the current chairman of Working Party 1 on regulatory issues for the APT Preparatory Group.**
- 6. Presenter and session chairman at various industry conferences on mobile communications and personal communications systems.**

**Alan has also authored several papers in international journals and has been an invited speaker at both international and national seminars and conferences.**
