

Kjell Strandberg

started his career as a designer of converter/inverter equipment for telecom installations at ASEA, now ABB. Worked for LM Ericsson in various positions for strategic business development (teletraffic theory, reliability/maintainability and quality of service management, ...) for public telecom systems. Author of more than 50 papers to symposia and magazines on these subjects. Active as rapporteur in various CCITT SGs. Official in IEC Technical Committees. Swedish delegate to ISO and ISO/IEC JTC1. Since mid 90s head of the ETSI Standards Making Support department. ETSI partner representative in Project MESA. ETSI delegate to ITU-T TSAG .
