

Hubert AZEMARD

is the President of TETRAPOL Forum, a manufacturers' association in charge of promoting TETRAPOL technology. His primary mission is to support and accelerate standardization for secure radiocommunications networks and is instrumental in promoting the emergence of new digital technologies in the professional radiocommunications.

Mr. AZEMARD, graduated from ENSEEIHT Toulouse engineering school in France, has spent a significant part of his career in the radiocommunications field, helping define and implement the national Saphir mobile radiotelephone network for the French Gendarmerie during his eight years with Philips group.

He then spent years as head of communications products at Steria, a European leading telecommunications software engineering firm.

Following this, Mr. AZEMARD worked within the Alcatel group for eight years, focusing on networks and PMR systems at a specialized radiocommunications subsidiary. He played a pivotal role in the development and market acceptance of a new range of trunked network products.
